# THE UNIVERSITY

---

The University of Rhode Island is a coeducational state-assisted institution founded in 1892 as one of the land-grant colleges. In 1971 it became one of the first four sea grant colleges in the country.

The function of a university is the discovery and dissemination of truth through instruction, research, and extension activities. Consistent with the University's land-grant tradition, preparation for a life's work and for intelligent and responsible citizenship is a major goal of instruction.

All programs aim at a balance of studies in the natural and social sciences, the humanities, and professional subjects.

The full-time teaching faculty numbers about 800, and there are over 11,000 graduate and undergraduate students at the University's main campus.

The University of Rhode Island prohibits discrimination on the basis of race, sex, religion, age, color, creed, national origin, or handicap in the recruitment, admission or treatment of students, the recruitment, hiring or treatment of faculty and staff, and the operation of its activities and programs, as specified by State and Federal laws, including Title VI and VII of the Civil Rights Act of 1964 as amended. Title IX of the 1972

Education Amendments to the Higher Education Act, Executive Order 11246, as amended, and Section 504 of the Rehabilitation Act of 1973. Inquiries concerning compliance with anti-discrimination laws should be addressed to the Affirmative Action Officer, University of Rhode Island. Questions regarding provisions for the handicapped should be directed to the Committee to Meet the Needs of the Handicapped.

**History.** The University was originally chartered as the state agricultural school in accordance with an act of the Rhode Island legislature on March 23, 1888. The Oliver Watson Farm in South Kingstown was purchased for the site of the school and the old farmhouse, now restored, still stands on the campus today. The school became the state college by act of the state legislature on May 19, 1892, creating the Rhode Island College of Agriculture and Mechanic Arts, and the first class of 17 members was graduated in 1894.

Funds for the creation of state colleges came from the Morrill Act of 1862 which provided for the sale of public lands, the income from which was to be used to create at least one college in each state with the principal objective of teaching agriculture and mechanic arts. From this grant of land comes the name land-grant colleges, applied to the national system of state colleges.

In 1909 the name of the college was changed to Rhode Island State College. The original program of study in science, engineering and agriculture was revised and expanded. On March 23, 1951, by act of the state legislature, the college became the University of Rhode Island and the various schools became colleges within the University. In July 1970 the Board of Regents for Education succeeded the Board of Trustees of State Colleges as governing body for the state's institutions of higher learning. An historical outline may be found in the appendix.

**The Campus.** The University's main campus is located 30 miles south of Providence and six miles from the ocean. It encompasses 1200 acres in the village of Kingston just off R.I. Route 138. The center of the University is a quadrangle of handsome granite buildings on Kingston Hill. Surrounding this are other academic buildings, student residence halls, and fraternity and sorority houses. On the plain below are gymnasiums, athletic fields, and tennis courts, and a freshwater pond. Agricultural experiment areas and greenhouses are nearby.

The University has two other large tracts of land: the 165-acre Narragansett Bay Campus, six miles to the east, where the Graduate School of Oceanography, the Rhode Island Atomic Reactor, and several federal laboratories devoted to the marine sciences are located; and the 2300-acre W. Alton Jones Campus, 20 miles away in

West Greenwich, the site of environmental education, research and conference facilities. The Division of University Extension has a building near the State House in Providence which is headquarters for the University's adult education program.

**Accreditation.** The courses and programs of study offered by the University of Rhode Island have been approved by national accrediting agencies and are accepted for credit toward college degrees by other approved institutions of higher learning. The national accrediting agencies which have approved the quality of the course offerings of the University of Rhode Island include the American Association of Universities, the American Assembly of Collegiate Schools of Business, the American Chemical Society, the American Council on Pharmaceutical Education, the American Dental Association (Council on Dental Education), the American Library Association, the American Psychological Association, the American Society of Journalism School Administrators, the Accreditation Board for Engineering and Technology, the National Association of Schools of Music, the National League for Nursing, the New England Association of Colleges and Secondary Schools, and the State University of New York.

The University is also an approved member institution of the American Association of University Women, the Council of Graduate Schools in the United States, the North American Association of Summer Sessions, and the National University Extension Association.

**The University Libraries.** The University's library collection of over 650,000 bound volumes and over 650,000 volume-equivalent microforms is housed in the University Library, the Division of University Extension Library in Providence, and the Claiborne Pell Marine Science Library on the Narragansett Bay Campus, which was designated the National Sea Grant Depository in 1971.

The University Library, which holds the bulk of the collection, is a four-story, air-conditioned building where open stacks provide direct access to books, periodicals, documents, maps, microforms and audiovisual materials. The Special Collections Department collects and maintains rare books, manuscripts, the University archives and a variety of special interest materials. Service hours at the other libraries vary, but the University Library provides full reference, bibliographic, and circulation services during most of the 90 hours per week it is open. Terminals linked to the University Academic Computer Center are available in the Library during the hours both facilities are operating. Coin-operated copiers are available for reproducing pages from books and journals, and for

producing copy from microform. A computer-based bibliographic system makes most books available to users one week after their receipt.

## Academic Instruction

**Degrees.** Undergraduate students may earn a Bachelor of Science degree in any one of the seven degree-granting colleges of the University. Study in the College of Arts and Sciences may also lead to the degree of Bachelor of Arts, Bachelor of Fine Arts, or Bachelor of Music. An undergraduate program at the Division of University Extension leads to the Bachelor of General Studies degree. In the two-year programs in dental hygiene and in commercial fisheries the degree of Associate in Science is conferred.

Study at the graduate level leads to the master's degree in over 60 areas of study and the degree of Doctor of Philosophy in 24.

**Undergraduate Programs.** All freshmen who enter the University to earn a bachelor's degree are first enrolled in University College. See page 33.

Undergraduates have a wide choice of programs from which they may select a concentration. The advising program in University College provides assistance in decision-making and in pursuing the curriculum of one's choice.

**Graduate Study.** Graduate study is offered leading to the degrees of Master of Arts, Master of Science, Doctor of Philosophy, and the master's degree in several professional fields. Within each college's chapter in this bulletin, the related graduate degrees are listed.

The Graduate Library School which offers study leading to the Master of Library Science degree is located on the Kingston campus. Students in undergraduate and other graduate programs may, with the approval of their advisers, enroll in such library science courses as relate to their studies.

The Graduate School of Oceanography, located on the Narragansett Bay Campus of the University offers study leading to the Master of Science and Doctor of Philosophy degrees. Instruction is limited to graduate study with the exception of a survey course in general oceanography and an intensive work experience program designed to provide undergraduates with a total involvement for one semester in a marine research laboratory setting. Both of these offerings are at the 400 level.

Students holding the baccalaureate degree from this institution or from another having equivalent requirements may be admitted for graduate study providing that their credentials meet the standards set by the Graduate School and by the department in which they wish to study, and that facilities for study are available in their field of interest. Among the standards required for full status admission are an under-

graduate average approximating B or better and satisfactory scores on a nationally administered examination. Applicants with somewhat lower undergraduate averages but high examination scores may be admitted on conditional status. Individual departments may, however, apply admission standards which are higher than the general standards just described.

Application forms and a copy of the *Graduate School Catalog*, which contains the detailed requirements and descriptions of advanced degree programs, are available from the Dean of the Graduate School, University of Rhode Island, Kingston, RI 02881. The zip code must be included in the applicant's return address. If, after studying the catalog, the applicant has specific questions concerning particular degree programs or courses of instruction, these should be addressed to the chairperson of the appropriate department. Applications must be returned to the Dean of the Graduate School.

Each applicant must submit (1) completed application forms in duplicate, with a \$15 non-refundable application fee (check or money order payable to the University of Rhode Island); (2) three letters of recommendation from individuals familiar with the applicant's work, preferably in the field for which he or she is applying; (3) two copies of an official transcript sent directly from each college or university attended; and (4) scores from the Graduate Record Examination aptitude tests (see the *Graduate School Catalog* for those programs which require the GRE advanced tests or which require a different national test).

Applicants from foreign countries must complete the Test of English as a Foreign Language (TOEFL) with minimum scores of 500 for science students and 550 for non-science students. All inquiries from international students concerning applications, fees, housing, etc., should be directed to the Director for International Student Affairs, 4 Taft Hall.

The usual deadlines for receipt of applications are April 15 for September and Summer Session admission, and November 15 for February admission. See the *Graduate School Catalog* for those programs which have earlier application deadlines.

**Division of University Extension.** The Division of University Extension offers continuing education and degree programs designed for adults whose family or work responsibilities have caused interruption in their formal post-high-school education. Academic programs lead to Bachelor of Science degrees in business administration, industrial engineering, and nutrition and dietetics. Bachelor of Arts degrees may be obtained in child development and family relations; economics; English; general home economics; history; home economics education; psychology;

secondary education; speech communication; and textiles, clothing, and related art. The Bachelor of General Studies degree offers a concentration in business and human services. Graduate-level programs include a Master of Arts in English, Master of Business Administration, Master of Public Administration, and Master of Science in mechanical engineering and applied mechanics.

**Providence Center.** Courses are offered in the morning, afternoon, and evening, and students enrolling in a degree program may attend at whatever time is most convenient for them. The Nursery School provides nursery education during the week from 8:45 to 12 noon for children three and four years old.

Certification programs for various professions as well as individual credit and non-credit (CEU) courses are offered. In addition, institutes, seminars, conferences, and special courses are planned for business, industry, labor, government, and the professions.

Psychological Testing Services provides psychological testing, and group and individual guidance. This office is a center for administration of the CLEP examinations.

The Extension Division faculty is drawn from resident URI faculty as well as specialists in professional and business fields. Headquarters are in the University of Rhode Island Building located in Providence and catalogs of credit and certificate courses and programs are available there.

**Community Centers.** The Division of University Extension operates community centers throughout the state. Both credit and non-credit evening courses are offered in Kingston, Middletown, and Westerly.

**Summer Sessions.** Two five-week sessions are conducted at both the main campus in Kingston and at the Division of University Extension in Providence. In addition, a number of workshops, institutes, and other special programs are offered at varying dates throughout the summer. Registration begins as soon as the Summer Session course list is published in April and continues at both campuses until classes begin. Students planning to attend both five-week sessions may register separately by submitting their Term I registration and fees first, and later completing their Term II registration and fee payment by means of the ADD Form. The \$8 registration fee is payable only once, with the initial registration. Students should complete their registration at least two weeks before the first day of classes because classes with insufficient enrollment are cancelled on the Wednesday before the start of each five-week session. In addition, classes with fewer than ten students may be cancelled by the instructor on the first day of classes.

## Research and Extension Programs

**Research.** Active programs of research are carried on throughout the University. The Coordinator of Research signs, on behalf of the University, applications for research grants, maintains files of funding agencies, keeps a current facilities inventory, and in general acts as a liaison officer for the President, the business manager, the academic deans, the Research Committee and the faculty in matters pertaining to the general research policy.

In addition to the strong research programs in the various departments, the University has established the following programs in specially defined areas. Support comes from foundations, commercial firms, federal and state governments, and the University.

**The Academic Computer Center.** The Academic Computer Center has an Intel AS/5 computer with 4096K of high speed storage, disk storage units, magnetic tape, card, and printer input/output devices, and an off-line plotter. The system's hardware and software accommodate both remote batch and interactive terminal usage with graphics support as well as normal batch processing. A Prime computer which supports time-sharing and intermediate-speed remote batch input is installed at the Narragansett Bay Campus. The Department of Electrical Engineering has a Data General Eclipse and two PDP-9 computers with a graphics display console linked to the Academic Computer Center's system. Various types of typewriter and display terminals for interactive use or remote job entry are located on the campus in most of the science and engineering departments as well as the College of Business Administration, the College of Pharmacy, the University Library, the Graduate School of Oceanography, and the Academic Computer Center. Off-campus installations include the Division of University Extension and various high schools in the state.

The staff develops and maintains programming systems and application programs, conducts short courses and workshops, and provides programming assistance for the University community. Faculty members of the Department of Computer Science and Experimental Statistics consult on numerical methods, statistical analysis, and computational techniques.

**Agricultural Experiment Station.** Established in 1888, the Agricultural Experiment Station within the College of Resource Development is concerned with basic and applied investigation in natural and human resources. This research aims at conserving and managing resources, at improving the quality of environments, at abating pollution and recycling waste materials, at

enhancing rural environments, at developing more rewarding home life, and at supporting resource-using industry and business in the region.

Research is conducted in food and resource chemistry, resource economics, plant and soil science, plant pathology and entomology, forest and wildlife management, animal science, and animal pathology. A strong orientation to estuarine and marine problems and an interdisciplinary approach to resource research are station characteristics. The progress of research and complete results of individual projects are issued in station bulletins. All are available to Rhode Island residents upon request.

**Bureau of Government Research.** The bureau is the research, consulting, and training arm of the University in the field of public administration, specializing in state and local government. Organized in 1960, it provides consulting services in the areas of general organization and management, budgeting and finance management

systems, position classifications, pay plans and purchasing, and other administrative systems. It publishes monographs and related reference works in addition to informational pamphlets and research reports, as well as a bi-monthly newsletter. The bureau maintains a reference library in public administration and provides an information service to government officials.

The bureau has a working relationship with a number of University departments related to state and local problems and administers and conducts seminars and in-service training programs for state and local government officials.

**Center for Energy Studies.** The energy center at the University was established in 1977. Its purpose is to bring together and expand energy-related research at the University and to support the energy activities of state agencies, commercial establishments, and individual citizens of Rhode Island. It is organized to coordinate programs offered by the Cooperative Extension Service, the Office of Energy Education, and the

University energy manager. The center offers technical advice and a number of educational programs on the subject of energy conservation.

**Center for Ocean Management Studies.** The Center for Ocean Management Studies (COMS) was established in 1976 in response to a growing realization that the full potential of the coastal and marine environment will not be achieved unless new resource management concepts are developed. Recognizing that such an effort requires an interdisciplinary approach, its associate membership is representative of the various marine programs at the University. The policies and programs of the center are formulated by a steering committee, chaired by the Provost for Marine Affairs, and implemented by the executive director.

The purpose of COMS is to promote effective coastal and ocean management by providing a forum for interdisciplinary research, communication, and education on ocean management issues. The center identifies ocean management issues, holds workshops and conferences to discuss these issues, and develops recommendations and research programs to resolve them. Through its publications, research and communication efforts, and educational programs, it provides an opportunity for individuals from government, industry, and academic institutions to work together.

**Consortium for the Development of Technology.** The University is the contracting member of the Consortium for the Development of Technology (CODOT) which is based in the College of Resource Development. It is a subsidiary organization of the International Center for Marine Resource Development (ICMRD), described elsewhere. CODOT was organized in 1970 and its membership, in addition to the University, consists of Michigan State University, the University of Wisconsin, the University of California-Davis, and the University of Washington. CODOT was organized for the purpose of assisting in the improvement of food technology in low-income and developing countries, and has programs in several Latin American countries.

**Cooperative Extension Service.** An educational organization within the College of Resource Development involving the federal and state governments and regional agencies (Eastern, Northern, Providence and Southern Rhode Island Cooperative Extension Services), the service's main function is to extend educational resources to the people of Rhode Island.

Extension programs are concerned with the following areas: (1) home economics for contemporary living with emphasis on consumer and

management education, clothing, housing and home furnishing, child development and human relations, and nutrition; (2) 4-H and youth programs to assist young people to realize their individual potentials as responsible citizens; (3) resource development information related to home grounds, general or specialized farms, nurseries, orchards, forests, etc., to help groups and individuals enhance the well-being of the community.

Offices of the Cooperative Extension Service are located in Providence, Newport, Greenville, East Greenwich, and Kingston.

**Curriculum Research and Development Center.** Founded in 1969, the Curriculum Research and Development Center conducts sponsored research in the broad field of education. While specializing in curriculum evaluation and development at the elementary and secondary level, its staff also engages in basic research in a variety of areas including life-long learning, measurement, and human services. There are specialists in research methodology, basic skills, bilingual, bicultural, adult and vocational education, survey and census methods, educational program administration, and testing.

The Curriculum Research and Development Center is an integral part of the Department of Education in the College of Human Science and Services and maintains close liaison with the Rhode Island Department of Education and human service agencies within the state and the region.

**Division of Engineering Research and Development.** This division was established in 1942 to coordinate the research activities of the College of Engineering. It disseminates the results of basic or fundamental investigations; conducts fundamental and applied research projects; provides opportunities for graduate students and highly qualified undergraduates to participate in research studies; and offers opportunities for members of the engineering faculty, through research, to keep abreast of advances in the profession.

The division is an integral part of the College of Engineering, and members of the college participate in all division projects. Facilities are available for research in the fields of chemical, civil, electrical, industrial, mechanical, materials, nuclear, environmental, and ocean engineering.

**Division of Marine Resources.** The purpose of this division is to develop, package, and deliver information, technology, and research results which can be used by the marine community of the state, region, and nation. The division's broadly-based services are provided to units of

government at all levels, business and industry, and the general public. It conducts specialized applied research investigations in cooperation with the Graduate School of Oceanography and with other URI research faculty who participate in the division's activities on a project-by-project basis. The division is the umbrella unit for the Marine Advisory Service, the Coastal Resources Center, the National Sea Grant Depository and the Regional Coastal Information Center.

**Marine Advisory Service.** The service provides field specialists and information to the marine community of the state and region under the public service responsibility of the URI Sea Grant Program. Projects include work with commercial fishermen, marina and boatyard operators, local and state governments, elementary and secondary schools, seafood processors, and individuals and businesses interested in the management, use, development, or understanding of marine resources.

**Coastal Resources Center.** The CRC offers technical assistance in the form of studies and surveys aimed at solving marine and coastal management problems. Since its establishment in 1971, it has served as a primary resource for the state's Coastal Resources Management Council. The center has produced a number of reports and publications and sponsors marine and coastal research projects in cooperation with various departments throughout the University.

**National Sea Grant Depository.** Housed in the Claiborne Pell Marine Science Library, the depository was established in 1971 to ensure that materials published under sea grant auspices would be available at a single location. Its subject matter touches such widely diverse areas as aquaculture, law, medicine, geology, chemistry, biology, engineering, mathematical modeling, food technology, information retrieval, recreation, coastal zone management, and market research. The NSGD publishes an annual computer-produced index, makes available loan copies of documents, and conducts literature searches.

**Regional Coastal Information Center.** Established in 1977 to provide coastal and marine information and data to planners, managers, legislators, decision-makers, and researchers, the RCIC is sponsored by the National Oceanic and Atmospheric Administration. It is the first of three such centers linked by a computer conferencing system to form a network. RCIC's principal services include selective dissemination of information, literature searches, state-of-the-art compilations, regionally-focused data files, lists of newly-published materials and resources, and newsletters and brochures.

**Graduate School of Oceanography.** The Graduate School of Oceanography is located on the 165-acre Narragansett Bay Campus. The land borders the shore and includes a basin and dock within easy reach of both the bay and the open ocean. The University operates several vessels, the largest of which is a 177-foot ocean-going research ship, *Endeavor*.

A number of buildings make up the Bay Campus shore facilities including laboratories, offices, the Claiborne Pell Marine Science Library, a 12,000-square-foot research aquarium, and a specially designed facility which permits moderate-scale controlled ecosystems experiments. The research program includes basic and applied studies in physical, chemical, geological, and biological oceanography, including fishery biology.

**International Center for Marine Resource Development.** The University founded the International Center for Marine Resource Development in 1969 specifically to help other countries solve their marine resource problems through education, research, and extension programs. It is a University-wide center with a subsidiary organization, the Consortium for the Development of Technology (CODOT) which is described elsewhere.

The center's initial mandate from its major sponsor, the Agency for International Development (AID), was to develop expertise to meet marine resource problems posed by other countries and to provide educational experiences for international students and guests. Currently, the center is assisting in several AID-sponsored research projects designed to improve the status of small-scale fishermen and fisheries in less-developed countries to help combat the world's food shortage. ICMRD is also assisting the new University Institute of the Azores to organize and administer fisheries and rural extension services.

ICMRD offers faculty and selected graduate students, through a US/AID-funded Strengthening Grant, opportunities to participate in its overseas programs, thereby gaining experience in their fields of interest and furthering the University's international outreach.

**Laboratories for Scientific Criminal Investigation.** These laboratories in the Department of Pharmacology and Toxicology of the College of Pharmacy provide instruction, research, and service in the field of scientific criminal investigation. The laboratory staff works closely with the Rhode Island Attorney General's Office and also provides technical consultation for various law enforcement agencies, and special instruction and research in criminalistics, in which faculty members of various departments partici-

pate. The program sponsors a special course for police and law enforcement agencies.

**Research Center in Business and Economics.** The research activities of the College of Business Administration are centered in this organization established in 1965. The center initiates, conducts, and services research activities of the faculty in the fields of accounting, business education and office administration, business law, economics, finance, insurance, management science, marketing management, organizational management and industrial relations, and production and operations management. The center publishes *The New England Journal of Business & Economics*, whose main focus is upon the business and economic issues which directly or indirectly concern New England.

**Rhode Island Water Resources Center.** The Rhode Island Water Resources Center, established in 1965, is the state center for research and training in all phases of water resources. There is a similar center or institute in each of the 50 states and Guam, Puerto Rico, the Virgin Islands and the District of Columbia, established through Public Law 88-379 in 1964. The states work cooperatively with the federal government in an effort "to assist in assuring the nation at all times of a supply of water sufficient in quantity and quality to meet the requirements of its expanding population."

Each center currently receives a federal appropriation each year to carry on its work. Congress may appropriate additional sums to match, on a dollar-for-dollar basis, funds made available to the center by the state or other non-federal sources to meet the necessary expenses for specific water resources research projects.

Principal investigators of projects need not be employed at the University of Rhode Island; in fact centers are encouraged by the act to plan and conduct programs with such other agencies and individuals as may contribute to the solution of the water problems involved.

## Other Organizations

**University Press of New England.** The University is a member of this organization which publishes manuscripts originating on the seven member campuses and elsewhere, as determined by its director and editorial board on which the University of Rhode Island is represented.

**Faculty Government.** The Faculty Senate represents the faculty and was authorized in 1960 by the general faculty to conduct in a responsible and efficient manner the business assigned to

faculty jurisdiction by the law or by the Board of Regents. The Graduate Council is the representative body for the graduate faculty in determining the academic policies for graduate study.

**University Ombudsman.** The office of the ombudsman was created in 1972 to investigate complaints from members of the University community — students, faculty, or administrative personnel — that they have been unfairly dealt with in the normal channels of administrative process. The ombudsman office does not replace normal channels, but is used when the normal channels do not adequately respond.

The ombudsman is a tenured member of the faculty who is elected by the general faculty. He or she is assisted by a student who has been nominated by the Student Senate and appointed by the President of the University.

**Instructional Development Program.** This program was created in 1975 as a resource for faculty members interested in increasing their teaching effectiveness. It offers teaching workshops, colloquiums, and seminars, as well as personal consultation for University faculty.

**URI Clearinghouse for Volunteers.** Sponsored by the College of Human Science and Services, the purpose of URI Clearinghouse for Volunteers is to encourage and facilitate URI volunteer activity. The clearinghouse maintains current listings of volunteer opportunities in community human service organizations, recruits URI students, faculty and staff to fill these positions, and matches prospective volunteers with appropriate placements.

**The Alumni Association.** Anyone who has attended the University for two semesters or more and whose class has graduated, is automatically a member of the Alumni Association. The organization, which now numbers close to 45,000 members, exists to promote the interests of the University and maintain the ties of alumni with their alma mater. The association offers many programs and services for alumni and students, publishes an alumni bulletin and has an annual fund drive to provide scholarship aid to students.

**University of Rhode Island Foundation.** The University of Rhode Island Foundation was created in 1957 to encourage and administer gifts from private sources, with the primary purpose of building a substantial endowment, the income from which would assure continuing support to the University. The foundation is particularly concerned with activities of the University, its students and faculty for which adequate provision is not ordinarily made by appropriations from public funds.

# PROGRAMS AND REQUIREMENTS

---

Consistent with its policy of allowing the greatest latitude possible in course selection, the University offers a wide choice to fill its general education requirements and encourages students to select free electives that cross departmental and college lines. This section deals with academic requirements, regulations and opportunities that are University-wide rather than college-related.

Each curriculum at the University is designed primarily as a learning experience for the student. The University attempts to provide the successful student with a range of knowledge and skills which can, with appropriate motivation and initiative, be used in a variety of ways after graduation. Study options vary from the traditional liberal education to programs which are heavily vocationally oriented. Successful completion of any course of study at the University, however, does not guarantee that the student will find either a specific kind or level of employment.

Students interested in the career opportunities related to particular programs of study are encouraged to consult University College advisers, the appropriate department chairperson, and/or the staff of the Office of Career Services. For

students who are uncertain about their career choices, the Counseling Center offers help.

The University administration, which has the responsibility of maintaining academic standards for such purposes as accreditation, determines the courses and program requirements. These may be changed without prior notice to the student, but an effort will be made in such cases to adjust requirements to take into account the best interests of the student. Changes in the academic calendar due to major storms, labor unrest, or other circumstances, may be made when it is in the best interest of the institution, and without prior notice to the students.

## General Education Requirements

Students must meet the curricular requirements of the colleges in which they plan to earn their degrees (pages 34-87).

All undergraduate students in baccalaureate degree programs at the University and in its Division of University Extension are required to select and pass 45 credits of course work from Divisions A, B, and C. Of these, 18 credits shall be taken in one division, 15 credits in a second, and 12 credits in a third. For exceptions to these requirements, see Division D and the ROTC exception below.

Transfer students may receive general education credits for courses taken at another institution as long as such credits are in courses equivalent to courses given general education credit at the University of Rhode Island. The assignment of courses to general education divisions at URI is as follows:

**Division A.** Any course for which the prerequisites have been met in art; English; languages (except 100, 101, 102, 111 and 112 and Portuguese 311, 312); linguistics (except 330); literature in English translation; music (literature and history); Plant and Soil Science 242; philosophy (except 101); Theatre 100, 216, 281, 282, 381, 382, 383, 483; and Speech 231, 331, 332, 333, 400, 433. Only one studio course in art may be applied to this requirement.

**Division B.** Any course for which the prerequisites have been met in astronomy, biochemistry, biology, biophysics, botany, chemistry, climatology (Geography 404), all courses in computer science (except 220), earth science, genetics, geology, History 373, mathematics, meteorology (Geography 403, 405, 406), microbiology (bacteriology-virology), oceanography, physics, Psychology 382, statistics, and zoology.

**Division C.** Any course for which the prerequisites have been met in Accounting 201; anthropology; Business Education 110; Computer Science 220; economics; Education 102, 312, 403; Engineering 204; geography (except 104, 403, 404, 405, 406, 409); history (except 373); Home Management 220; Journalism 434, 435, 438; Linguistics 330; Marine Affairs 210, 312, 410; political science; Portuguese 311, 312; psychology (except 300, 381, 382, 410, 434); Resource Development 100; sociology; Speech 210, 310, 315, 374; and Theatre 205, 206.

**Division D.** Students may elect up to nine credits in communications but may not reduce any other divisional requirements by more than three credits. Courses that will fulfill requirements in Division D include: Business Education 227; foreign languages, including Latin and Greek 100, 101, 102, 111, 112, 191, 192; Journalism 212, 324; Philosophy 101; Speech 101, 102, 201, 215, 220, 319; and Writing 101, 102, 300, 333.

**Exception.** If it is necessary to eliminate academic loads above degree requirements, students enrolled in the advanced ROTC program may apply to the appropriate academic dean for permission to substitute a maximum of six hours of advanced ROTC credit for the same number of credits, A, B, or C of the divisional requirements. Only three credits may be substituted in any one division.

## Other Academic Requirements

Certain basic courses are required in many curriculums for transfer from University College into the degree-granting colleges at the junior-year level. These are listed in the individual colleges' curriculums.

The responsibility for meeting all course and credit requirements for the degree must rest with each individual student.

Students who desire to accelerate their programs and receive credit for courses taken at other institutions or during Summer Session or in the Division of University Extension must have prior approval from their academic deans.

## Interdepartmental Study

Students are encouraged to develop interests across departmental lines and interdepartmental curriculums and areas of interest have been developed.

**Black Studies.** Students who declare Black Studies as an area of interest (see page 35) may

use the following courses to fulfill the requirements. BST 101, 102 (6 credits) are required. Elective courses (12 credits) may be selected from APG 313; ENG 345, 346, 444; HIS 150, 175, 345, 379, 384, 388, 580; PSC 495, 510; REN 595; SOC 340, 434. Permission may be obtained on an ad hoc basis to use other courses that have as their central focus one or another aspect of the black experience.

**Consumer Affairs.** This interdisciplinary area of interest is designed to help students learn effective strategies for dealing with complex social and economic systems relating to consumer concerns. Students who wish to declare an area of interest in consumer affairs should consult first with the Consumer Affairs Program head (see page 75) and then seek advice from a member of the Consumer Affairs Coordinating Committee for planning and course approval. The 18 credits selected for this program must be agreed upon by the student and the committee member.

Students desiring a stronger emphasis in consumer affairs may wish to pursue a degree in general home economics with a professional concentration in consumer affairs (see page 76).

Suggested courses for an area of interest in consumer affairs (18 hours) might include: HMG 220, 320, 350, 420, and 422, as well as courses in marketing and business law.

**Gerontology.** This a University-wide program. Its purpose is to develop within University teaching a clear recognition of the aging process and its implications, to promote the scientific and humanistic study of gerontological problems, and to relate the development of gerontology at the University to the larger community. The program, which is administered by a director and an advisory committee, maintains a consulting relationship with both the Rhode Island Institute of Mental Health and the Medical Center General Hospital. These and other alliances afford opportunities for research and practicum experience to students interested in problems of aging.

Students who declare gerontology as an area of interest must complete 18 hours of relevant course work. HCF 220 is required. Other gerontology courses include FSN 307, HCF 221, 380, 420, 421, 431; RCR 416 and SOC 438.

Interested students should contact the director of the program and are advised to do so as early as possible, preferably not later than the beginning of the senior year.

**New England Studies.** Students who declare New England Studies as an area of interest must take either NES 300 or 310 and elect at least one course from each of the following four categories: (1) Cultural Patterns — PSC 221, APG 317, ENG 430; (2) Aesthetic Dimensions — ENG 347, 440; (3) Historical Dimensions — HIS 335, 346,

362; (4) Physical Dimensions — BOT 323, 418, 424; FMT 118, FOR 301, 302, GEL 101, 455-57. Permission may be obtained from the Committee for New England Studies to use any rotating topics course, seminar, etc., whose focus is on some aspect of New England as a substitute for any of the above courses.

**Special Populations.** This new, interdepartmental area of interest provides students the opportunity to explore the theory and practical experience of working with disabled people. A minimum of 18 credits may be earned by taking the required courses of NUR 101; HCF 200 or PSY 232; PSY 442. Minimum of three credits in field experience and a minimum of seven credits of electives are selected in consultation with an adviser from one of the participating departments: Education; Food Science and Technology; Human Development, Counseling and Family Studies; Physical Education, Health and Recreation; Psychology; Sociology; Speech; Textiles, Clothing and Related Art; Theatre. The College of Human Science and Services administers the program and interested students should contact the program head for more information and a complete listing of possible electives.

**Textile Marketing.** This undergraduate interdepartmental curriculum may be pursued through the College of Human Science and Services (Department of Textiles, Clothing and Related Art) or through the College of Business Administration (Department of Marketing). The programs are: Textile Marketing or Marketing-Textiles.

Textile marketing managers are responsible for planning and directing the flow of textile products from the manufacturer to the consumer. The concentration, which provides a strong background in both textiles and marketing, is designed to give students the opportunity to explore the areas of styling and design, manufacturing, market research, consumer behavior, advertising, promotion, fashion, and sales. The specific requirements of the curriculum may be found on pages 59 and 79.

**Urban Affairs.** The undergraduate program in Urban Affairs consists of seven different interdepartmental degree curriculums, three in the College of Arts and Sciences and four in professional colleges. They aim to provide students with a general understanding of contemporary urban society and the opportunity to pursue specialized study of urban problems and prospects from the perspective of varied disciplines, whatever may be the students' interests and career objectives.

The seven concentrations are: (1) Urban Social Processes, (2) Policy Formation, and (3) Spatial

Development, in the College of Arts and Sciences; (4) Business in the Urban Environment in the College of Business Administration; (5) Urban Engineering in the College of Engineering; (6) Home Economics in the Urban Environment in the College of Human Science and Services, and (7) Resource Development in the Urban Environment in the College of Resource Development.

The curriculum in each area of concentration consists of a common core of courses and specialization courses. All students are required to take URB 210 and URB 498 or 499. In addition, they must select three courses from the following: CPL 410, PSC 460, GEG 411, ECN 402, SOC 434, and HIS 363. The specialization courses are detailed in the appropriate college section under each area of concentration in this bulletin.

The Urban Affairs Program is coordinating its offerings with the Department of Social Sciences at Rhode Island Junior College. Students at the junior college are encouraged to consult with their advisers if they wish to transfer to any one of the concentrations in the College of Arts and Sciences.

The Urban Affairs Program Coordinating Committee includes faculty members from departments throughout the University and supervises the operation of the program. With the endorsement of the faculty of the college concerned, the committee certifies completion of the concentration requirements for the appropriate undergraduate degree. A member of the committee serves as adviser for each of the seven concentrations and provides interested students with information.

**Women's Studies.** This program is designed for students who are interested in the interdisciplinary study of the culture and experiences of women. Courses are currently offered in three different colleges and nine different departments in order to provide a wide perspective. For a complete description of the curriculum see page 53.

## Preprofessional Preparation

Competition for places in graduate professional schools is keen, and a superior academic record throughout college is necessary for admission to these schools. Since requirements for the professional schools vary in their "essential" and "recommended" subjects, the student should consult the catalog of the professional school and then plan his or her undergraduate program accordingly. Those seeking careers as social workers may enroll as majors in sociology, including in their curriculum the social welfare courses. A basic foundation for graduate study, whether directed toward college teaching or research careers, can be provided through any of

the liberal arts or science majors. The bachelor of arts curriculum provides specific majors for those planning to become journalists or public school teachers.

**Prelaw Studies.** For students who plan professional study of law, guidance and program advice are provided by departmental advisers assigned in University College and by concentration advisers within various departments and colleges.

Students interested in law school should consult the *Prelaw Handbook*, prepared by the Association of American Law Schools and the Law School Admissions Council. The association finds it inappropriate, given the wide range of a lawyer's tasks, to prescribe either a set of prerequisite courses for prelaw students or preferred major departments. Rather it recommends that students choose their majors dependent upon their own individual intellectual interests and upon "the quality of undergraduate education" provided by various departments and colleges. "Shortly stated, what the law schools seek in their entering students is ... accomplishment in understanding, the capacity to think for themselves, and the ability to express their thoughts with clarity and force." The association emphasizes that "the development of these fundamental capacities is not the monopoly of any one subject-matter area, department or division."

**Premedical Studies.** For students who plan professional study in medicine, guidance and program coordination is provided by the premedical adviser and the Premedical, Predental, Preveterinary Advisory Committee.

The student should consult the prerequisites for professional schools to which he or she may expect to apply for admission. These are listed in *Medical School Admission Requirements*, published annually by the Association of American Medical Colleges.

Medical schools generally require at least a 3.3 grade point average and high scores on the required Medical College Admission Test (MCAT), taken preferably in the spring semester of the third undergraduate year.

The new MCAT was given for the first time in the spring of 1977. From an evaluation of the distribution of scores after this first administration of the test, it is reasonable to assume that successful applicants to medical schools will rank in the intervals above 10 in the 15-interval scoring system.

All candidates must have personal interviews with the Premedical, Predental, Preveterinary Advisory Committee. Normally these interviews will take place during the spring semester of the third undergraduate year.

Since only about 27 of each 100 applicants to

medical schools are admitted, it is wise to plan for an alternative career.

**The University of Rhode Island-Brown University Early Identification Program for Rhode Island Residents.** This is a plan for the early identification and acceptance into the program in medicine at Brown University of highly motivated, exceptionally qualified and interested students at the University of Rhode Island and at Providence College. The plan offers virtual assurance of a position in Brown's program in medicine, so long as the student completes the required courses and maintains a good academic performance. The program is designed to encourage a few of the most highly motivated students, who are Rhode Island residents, to make an early commitment to the study of medicine at Brown by providing them with acceptance assurance similar to that afforded students entering Brown's medical education program directly from high school.

URI students with cumulative averages of 3.5 and above are interviewed and evaluated by the URI Premedical, Predental, Preveterinary Advisory Committee after the completion of their freshman year. Certain of these students are then recommended by the URI Premedical Adviser on the basis of an *excellent academic record, exceptional promise as a premedical student, apparent suitability for the profession of medicine, Rhode Island residency* and a desire to study medicine at Brown. At the beginning of their sophomore year, these nominated students are interviewed and their applications are evaluated by the Medical Education Program Undergraduate Affairs Committee of Brown University.

Upon acceptance, they have the same status as their Brown counterparts, while continuing their studies at the University of Rhode Island. Like the Brown students, they are free to major in the arts or humanities, if they wish, as long as they complete the required premedical courses. As undergraduates they are also invited to take one or two of their premedical courses on the Brown campus with their future classmates, and are invited to colloquiums and various social events sponsored by the Brown Medical Student Society.

After the students in the Early Identification Program have been graduated from URI, at the point of entering the first year of the program in medicine, they go through the same promotions process required of all medical education program students. Academic performance, interviews with members of the Admissions Committee, Medical College Admissions Test (MCAT) scores, and faculty recommendations are all reviewed. Upon promotion they become full-fledged first-year medical students at Brown University.

**Predental Studies.** The recommendations for premedical preparation also apply to predental students, who are counseled by the same advisory committee.

The student should consult the course requirements for each dental school to which he or she may expect to apply for admission. These are listed in *Admissions Requirements of American Dental Schools*, published annually by the American Association of Dental Schools.

The Dental Admissions Test (DAT) is required, and normally this test is taken in the spring of the third undergraduate year. Competition for admission into dental school is nearly as keen as that experienced by premedical students. Thus, an excellent academic record, along with a 5 or 6 in each section of the test, usually is required.

Each candidate must have personal interviews with the Premedical, Predental, Preveterinary Advisory Committee. Normally these interviews will take place during the spring semester of the third undergraduate year.

**Premedical and Predental Curriculum.** A premedical or predental student may choose to study in any liberal arts or science curriculum, so long as the courses that are required by medical schools are included. Most students major in one of the biological or health sciences or in a related field, such as pharmacy or chemistry.

A recommended course of study is outlined below. Italicized items are *indispensable* for admission to any medical or dental school.

Ideally, these courses, or their equivalents, should be substantially completed before the MCAT or the DAT is taken.

**Chemistry.** At least 16 semester-hour credits, including *general inorganic*, qualitative and quantitative analysis, and organic; physical chemistry is sometimes required and is frequently recommended: CHM 101, 102, 112, 114, 212, 227, 228, 226; and in some cases 431 and 432, each with the associated laboratory.

**Biology.** At least 11 credits, including *general animal biology*, embryology, physiology or anatomy, genetics: ZOO 111, 316, 321 or 345, BOT 352.

**Physics.** At least 8 credits including PHY 111, 112.

**Mathematics.** At least 6 to 9 credits, through calculus, MTH 141, 142.

**English and Communications.** At least 12 credits, including WRT 101, 102 and a year of literature.

**Modern Foreign Language or Greek or Latin.** Through the intermediate level.

**Social and Behavioral Studies.** At least 6 credits. Psychology: PSY 113. Sociology: SOC 202.

**Preveterinary Studies.** Students who are interested in preparing for a professional career in veterinary medicine are counseled by the Premedical, Predental, Preveterinary Advisory Committee. Requirements for admission into the

study of veterinary medicine vary and the catalogs of veterinary schools should be consulted for specific requirements early in a student's undergraduate years. Many schools require the Veterinary Aptitude Test (VAT) or the Graduate Record Exam (GRE). Ordinarily, either test should be taken in the spring semester of the third undergraduate year. Moreover, some experience in the animal sciences is expected by some veterinary medical schools.

A preveterinary student may choose to follow the bachelor of science curriculum in animal science (described elsewhere in this *Bulletin*), or he or she could be guided by the course of study recommended above for premedical and predental students.

Each candidate must have personal interviews with the Premedical, Predental, Preveterinary Advisory Committee. Normally these interviews will take place during the spring semester of the third undergraduate year.

Competition for admission into schools of veterinary medicine is extraordinary. Therefore, evidence of high motivation and an outstanding academic record are essential.

## Honors Program

The University Honors Program offers bright and motivated students opportunities to broaden their intellectual development and to strengthen their preparation in their major fields of study. The program consists of honors courses for freshmen, an honors colloquium for sophomores, tutorial courses for juniors, and individual honors projects or special seminars for seniors. The courses offered in the first two years treat general topics and may count toward the satisfaction of general education requirements. The courses offered in the last two years are specialized in nature and count towards the satisfaction of concentration requirements. Eligibility standards are established yearly by the Honors Program and Visiting Scholars Committee.

In order to graduate with honors, a student must complete, with a QPA of 3.0 or better, at least 15 credits of course work in the Honors Program, including the third year tutorial (6 credits) and the fourth year honors project or special seminar (6 credits). However, eligible students may register for any number or pattern of honors courses they choose.

## University Year for Action

This program provides a full-time one or two semester internship experience for students interested in public service careers. It is especially

designed for the gifted student who wishes to combine classroom learning with a field experience apprenticeship. Students may apply from any undergraduate curriculum which permits 15-30 credits of free electives to be used for an internship. Placements are available in mental health, social services, community planning, urban affairs, nutrition, women's studies, law, public health, resource management, and many other fields. To apply, students must have junior or senior standing and a minimum Q.P.A. of 2.50.

## Dean's List

Full-time undergraduate students who have achieved certain levels of academic excellence in any semester are honored at the end of that semester by inclusion of their names on the Deans's List. The Registrar will publish lists of students who have attained the required quality point average.

A student may qualify for the Dean's List if he or she has completed 12 or more credits for letter grades in a semester. Freshmen and sophomores shall qualify by achieving a 3.0 quality point average; juniors and seniors, a 3.2 quality point average.

## Intellectual Opportunity Plan

This "pass-fail" plan encourages undergraduate matriculated students to increase their intellectual breadth and discover aptitudes in new areas of knowledge. A student above the freshman level who is not on probation may register under this plan for courses considered by the college in which he or she is enrolled as free, unattached electives. Courses that are stipulated in the student's curriculum as degree requirements, general education requirements, and military science courses may not be included.

A student choosing to take a course under this plan must notify his or her adviser, academic dean and the Registrar's Office in writing, prior to the end of the add period of each semester. The instructor is not informed.

Grades will be S (satisfactory) or U (unsatisfactory). The S grade is credited toward degree requirements, but not included in the quality point average. The U grade is not credited and is the equivalent of an F grade in calculation of quality points. If a student has selected the S/U option for a course, then decides not to use the S/U option, he or she may change by notifying the Registrar before the last date for dropping courses.

A student may elect not more than three S/U courses each semester and not more than two S/U courses during a summer.

## Reserve Officers Training Corps

The Military Science Department offers the ROTC Program which enables any college student to earn a commission in the United States Army while simultaneously earning a college degree. A four-year program exposes the military science student to military history, international relations, leadership, management, and the principles of effective organization. A laboratory period allows students to put into practice the theory presented in academic instruction. Credit toward graduation is received for all classroom instruction and, for the final two years of instruction, each student receives a monthly stipend of \$100. Those enrolled in military science courses are also eligible to compete nationally for full Army ROTC scholarships.

A modified two-year program is available to sophomores and graduate students which substitutes a six-week summer training period or an on-campus six-credit summer program for the first two years of study. An ROTC graduate has the option to serve a three-year duty tour in the active Army or a six-year, part-time tour in the Army Reserve Force.

## Grades and Points

All grades are reported as A, superior; B, good, above average but not superior; C, average; D, low grade, below average, passing; F, failure; S, satisfactory; U, unsatisfactory.

Grades are given quality point values as follows: A, 4 points; B, 3 points; C, 2 points; D, 1 point; F, S and U, 0 points.

A grade may be reported as "incomplete" only when course work has been passing but has not been completed due to illness or another reason which in the opinion of the instructor justifies the report of incomplete. Incomplete grades that are not removed from an undergraduate student's record by the following mid-semester will remain on the student's permanent record.

Making up failures in elective courses is not required, but making up failures in required courses is. The course should be repeated when next offered. No limit is placed on the number of times a course may be repeated, but the credit requirement for graduation is increased by the number of credits repeated.

Certain courses do not lend themselves to precise grading and for these courses, only S (satisfactory) or U (unsatisfactory) shall be given to all students enrolled. S/U courses shall be labeled as such in the University catalogs and bulletins. S/U courses are not counted as courses taken under the Intellectual Opportunity Plan.

**Probation and Dismissal.** A student shall be placed on scholastic probation when his or her cumulative scholastic average falls below 2.0 after completing 23 or more credits, but not if he or she has a deficiency of four (4) or fewer quality points below a 2.0 average after completing 22 or less credits.

A student shall be dismissed for scholastic reasons when he or she has a deficiency of eight (8) or more quality points below a 2.0 average after being on probation the previous semester. A freshman student who earns less than a 1.0 average in his or her first semester shall be automatically dismissed. A student subject to dismissal shall be so notified by the dean, after which he or she shall have five days to file a written appeal with the dean.

Students are expected to be honest in all academic work. A case of cheating or other form of academic dishonesty, such as plagiarism, shall be reported by the academic dean of the college or school in which the student is enrolled to the Director of Student Relations who shall arrange for a hearing by the University Board on Scholastic Integrity. Procedures for such a hearing are described in the *University Manual*.

## Withdrawal from College

An undergraduate student wishing to withdraw from the University at any time other than at the end of semester is required to secure a "withdrawal form" from the Office of Career Services. This form, when completed, is taken to the Office of the Bursar for settlement of account.

A student who leaves the University during the course of a semester without officially withdrawing may get grades of failure in his or her courses.

If a student officially withdraws from the University after mid-semester, a symbol of "W" shall be recorded for each course in which he or she was registered. A student who withdraws from the University after the last day for dropping courses, and who seeks readmission for the next semester, may be readmitted only upon approval by the Scholastic Standing Committee for the college or school in which registration is desired.

## Undergraduate Graduation Requirements

To graduate, a student must have completed the work for, and must have achieved the minimum quality point average established by, the curriculum in which he or she is enrolled.

Total quality points earned must equal at least twice the total number of credits for which the student has registered in that curriculum.

A transfer student who has met the requirements for two degrees and has taken an additional 30 hours (24 of which must be taken at the University of Rhode Island) beyond the minimum requirements for the initial degree may be granted an additional bachelor's degree.

Any student who has met the requirements for a second bachelor's degree and has completed an additional 30 hours of credit beyond the minimum requirements for the initial degree may be granted two bachelor's degrees.

Students who have met the requirements for two separate concentrations within any single bachelor's degree curriculum have earned a double major and may have both fields listed on their permanent records.

A maximum of ten full semesters in one four-year curriculum will be allowed any student for graduation.

Exceptions to the requirements in the above paragraphs may be made upon recommendation by the college concerned.

Except in special cases, which shall be considered by the faculty of the college in which the student is registered, the work of the senior year must be taken in residence.

Students who complete at least 60 credits of their work at the University are eligible to graduate with distinction. Those who attain a cumulative quality point average at the time of graduation of at least 3.30 will be recognized as graduating "with distinction." Those who achieve a quality point average of 3.50 will graduate "with high distinction" and those who attain a 3.70, "with highest distinction."

A student who has successfully completed six semesters at the University in the curriculum in which he or she is registered, and then enrolls in an accredited professional college and receives a recognized professional degree, may apply for the degree of Bachelor of Science from the University of Rhode Island. The award if approved, will be made at the next regular commencement. For veterans, only four semesters in residence are required. The other two may be fulfilled by the service record evaluated in terms of University credit.

## University Manual

University regulations governing matters such as grading, probation and dismissal, academic integrity, withdrawal from college, and graduation requirements are fully explained in the *University Manual*. Copies of the *University Manual* are available in the Library and in the deans' offices.

# ADMISSION AND REGISTRATION

## Admission to the University

Ideally, admission to the University is a mutual selection process. It is hoped that those students who seek admission will also be the kinds of students sought by the University: those who will benefit from the educational opportunities afforded by the University, those who will be stimulated and challenged by doing undergraduate work in an environment that includes scholarly research and graduate study; those who are committed to becoming contributing members of the University. Students are selected for enrollment primarily on the basis of their academic competence and without regard to age, race, religion, color, sex, creed, national origin, or handicap.

Candidates must meet the unit requirements of the University College as listed below for entrance to the University. Furthermore, to meet the requirements for entry to any of the other colleges in the University at the sophomore or junior level, applicants must complete the additional units recommended by the particular college to which transfer is intended. See page 33 for description of the University College.

Applicants are given individual consideration, but it is expected that all candidates will

offer 16 units of college preparatory work as outlined below. If these requirements are not fully satisfied by secondary school study, they may be met wholly or in part by successful performance on appropriate examinations administered by the College Entrance Examination Board, the University, or the state Department of Education.

### Unit Requirements

*University College* requires 4 units in English, 2 in algebra and/or plane geometry, 1 in physical or natural science, 1 in history or social science, and 8 additional units as specified below for individual colleges.

*Arts and Sciences* requires 4 units in English, 2 in mathematics (2 in algebra or 1 in algebra and 1 in plane geometry), 1 in physical or natural science, 1 in history or social science, 2 in any single foreign language, and 6 additional units. Majors in chemistry and physics require 4 units of mathematics.

*Business Administration* requires 4 units in English, 3 in algebra and plane geometry, 1 in physical or natural science, 2 in history or social science, and 6 additional units.

*Engineering* requires 4 units in English, 4 in mathematics (algebra, plane and solid geometry, and trigonometry), 2 in physics and chemistry, 3 in history, social science and/or foreign language, and 3 additional units.

*Human Science and Services* requires 4 units in English, 2 in algebra and/or plane geometry, 1 in physical or natural science, 3 in history, social science, and/or foreign language, and 6 additional units.

*Nursing* requires 4 units in English, 2 in algebra and/or plane geometry, 2 in physical or natural science, 1 in history or social science, and 7 additional units.

*Pharmacy* requires 4 units in English, 2 in algebra and/or plane geometry, 1 in physical or natural science, 1 in history or social science, and 8 additional units.

*Resource Development* requires 4 units in English, 2 in algebra and/or plane geometry, 1 in physical or natural science, 1 in history or social science, and 8 additional units.

It is strongly recommended that additional units be selected from languages, history, mathematics, or science.

**Application Procedures.** Students should discuss their plans for study at the University with their academic counselors as early as possible to establish realistic goals and program selections. Admissions counselors at the University will be

glad to correspond with students on individual problems. Requests for application forms and information should be directed to the Office of Admissions, University of Rhode Island, Kingston, RI 02881.

Applications and requests for admission information from international students should be addressed to the Director for International Student Affairs in Taft Hall at the University.

Students are enrolled at the beginning of the fall semester in September and at the beginning of the spring semester in January. High School seniors are urged to submit applications early in their final year of preparatory study as the University subscribes to a "rolling" admissions policy, reviewing folders as soon as complete credentials are submitted. However, some applicants find it to their advantage to hold their forms until senior mid-year grades are available, so that their progress in the last year may be assessed by the Selection Committee. Closing date for fall term applications is March 1, and most decisions are reported in February, March and April. Closing date for spring term application is December 1.

*Early decision* is made on the application of any freshman candidate who has established a superior academic record, who has achieved above-average scores on the CEEB Scholastic Aptitude Test, and whose potential as a superior student is reflected in the secondary school endorsement. Applications which meet these qualifications and which are clearly labeled "Early Decision Candidate" are considered on a priority basis if filed prior to November 1.

Applicants to the Bachelor of Music degree program must audition and must contact the music department for specific requirements.

**Entrance Tests.** All freshman candidates for admission are required to take the Scholastic Aptitude Test. This test is administered by the College Entrance Examination Board.

Applicants are encouraged to take the SAT as early as possible in their senior years; delay beyond January date materially reduces a candidate's prospects for a timely decision. Full information concerning this test may be obtained from local high schools or by writing to CEEB Headquarters at P.O. Box 592, Princeton, New Jersey 08540.

Applicants for the curriculum in dental hygiene are required to take the SATs and the Dental Hygiene Aptitude Test in place of three achievement tests. Full information concerning this test may be obtained from the University Office of Admissions or from the American Dental Hygienists' Association, 211 East Chicago Avenue, Chicago, Illinois 60611.

International students who are not immigrants

must take an English proficiency test administered by the American Consulate or the Test of English as a Foreign Language (TOEFL) administered by the Educational Testing Service, Princeton, New Jersey 08540, U.S.A. Additionally the Scholastic Aptitude Test is required as outlined above.

**Interviews.** Personal interviews are not part of the normal admissions procedure. It would be impossible for the admissions staff to interview all candidates, and individual conferences are arranged only if a unique problem requires personal discussion.

**Group conferences** are scheduled several afternoons each week during the fall and early winter months. Students and their parents are invited to participate in these meetings to get acquainted with the University. Visitors are requested to phone ahead (401-792-2164) to be scheduled for these meetings.

**Campus Tours.** The Office of Community Relations provides daily tours of the campus for visitors. The tours are conducted by students. Group tours for high schools and other organizations may also be arranged. For more information about this service phone (401) 792-2737.

**Early Admission.** Students who have completed their junior year of high school with superior records are eligible for early admission. A part-time study program may be arranged for students who wish to begin college study in their senior year while continuing their high school work. A full-time program may be arranged for those recommended for college admission without completion of the standard preparatory program.

Early admission students would normally have completed: 3 years of English, 3 years of mathematics, 2 years of foreign language, 2-3 years of social studies or history. Students should be academically competitive within their high school class, have corresponding scores on the College Board PSAT, SAT or equivalent tests, and the endorsement of their school.

Interested persons should plan with their high school counselor early in their junior (11th) year and direct further inquiries to the University Admissions Office.

### Advanced Standing

*Advanced placement for freshmen* is granted to students who have completed college-level courses in a high school participating in the Advanced Placement Program and have passed with a grade of 3 or better the CEEB Advanced Placement Examination in the subject area for which advanced placement is sought. In addition,

students also may take proficiency examinations administered by departments of the University to be granted advanced placement. Entrance with advanced standing can accelerate the completion of degree requirements, or it can enrich the undergraduate program with greater scope for elective or advanced courses.

*Transfer students* who have attended, or are attending another college or university, are required to have official transcripts sent directly from the institution, whether or not they expect or desire credit for such work; their high school record must also be submitted. Most successful applicants offer a cumulative grade point average above 2.5. Except in very unusual circumstances, candidates incurring academic or disciplinary dismissal from other colleges are not eligible for admission. Candidates accepted with transfer credit are classified as freshmen, sophomores, juniors, or seniors according to the number of credits accepted for transfer. The transfer of General Education credits is described on page 10.

**Proficiency Examinations.** Students who show evidence of advanced knowledge or who have taken "enriched" programs in high schools may be exempt from certain courses and requirements if they take departmental proficiency examinations. A student who successfully passes such an examination earns credits as well as exemption from the course.

Upperclassmen interested in taking these exams should contact their academic dean. New students may obtain further information during the orientation or from their assigned adviser in University College.

**College Level Examination Program. CLEP General Examinations.** Students who have not been pursuing formal studies for at least three years may take the CLEP General Examinations to demonstrate what they have learned from a variety of life experiences. URI students must secure prior approval from their academic dean to take the exams for credit. Transfer students may receive credit from CLEP General Examinations taken prior to enrollment at URI provided that their scores meet URI standards and provided that their academic dean judges that the CLEP credit does not duplicate other transfer credit.

CLEP General Examinations may be taken in the following areas (URI credits for these are shown in parentheses):

	Minimum score	
English Composition (Division D elective, 3 credits <sup>1</sup> )	560	
Fine Arts (Fine Arts elective, 3 cr.)	46	
Literature (Humanities elective, 3 cr.)	45	
Biological Sciences (Natural Science elective, 3 cr.)	46	
Physical Sciences (Physical Science elective, 3 cr.)	44	
Social Sciences (Social Science elective, 3 cr.)	46	
History (Social Science elective, 3 cr.)	45	
Mathematics (no credit)		

**CLEP Subject Examinations.** Academic departments may use CLEP Subject Examinations as proficiency exams to test students' mastery of the subjects taught by the department. A department which judges a CLEP Subject Examination to be a satisfactory proficiency exam decides what credit should be awarded within the department to students who pass the exam, establishes the minimum score for credit, decides whether students must answer the optional essay questions supplied by CLEP, and decides whether students must pass a supplementary department test, such as a lab exam. The following CLEP Subject Examinations are accepted by departments as proficiency examinations.

**Readmission.** Students formerly enrolled at the University and seeking reentry may obtain applications for readmission at the Office of the Registrar. Readmitted students are subject to a \$15 application fee and must make a \$50 advance deposit. All applications for readmission must be submitted to the Office of the Registrar no later than August 15 for the fall semester and December 31 for the spring semester.

**Health Questionnaire.** Every newly entering student is provided a health questionnaire from University Health Services. It is expected that these questionnaires will be completed and returned promptly. This questionnaire provides University Health Services with basic informa-

tion prior to the student's arrival on campus. Questionnaires are distributed only after admission to the University and therefore play no part in the process of acceptance to the University.

In accordance with Section 16-38-2 of the General Laws of Rhode Island, the University must have a certificate signed by a licensed physician giving proof of rubella (German measles) immunity for each new female student between the ages of 15 and 35.

**New England Regional Student Program.** Under the cooperative plan of the New England Board of Higher Education (NEBHE), students from other New England states are admitted to certain curriculums at the University of Rhode Island which are not offered in their own states. Certain programs at other New England state universities are open to Rhode Islanders on a reciprocal basis. Regional students at the University will be charged the in-state fee plus a surcharge of 25 percent. However, if the student transfers out of the program of study that qualifies under the New England Student Program, out-of-state fees will apply. Details on the operation of this program are available on request from the New England Board of Higher Education, 40 Grove Street, Wellesley, Massachusetts 02181, or high school guidance offices. The Office of the Registrar provides information pertaining to this program for students who are already enrolled at the University.

Prospective students who wish to claim eligibility for this program must state so in the appropriate section on their application for admission. Continuing or returning students claim eligibility by contacting the Registrar's Office with a formal request.

**Special Program for Talent Development.** The University encourages the application of economically and socially disadvantaged individuals from Rhode Island and has instituted a pre-matriculation program designed to assist such applicants whose education is below college preparatory level. There is special financial provision for students in this program. Interested individuals should apply to Special Programs for Talent Development, 210 Ballentine Hall, as early as possible in their senior year in high school.

## Registration

All students must register for courses at the Registrar's Office in order to be properly enrolled.

**Preregistration.** The University preregisters matriculated (official degree-seeking) students who

meet the eligibility requirements as defined in the *Schedule of Courses*. Preregistration generally occurs in March and October for the following semester. However, freshmen entering in the fall semester preregister at specified dates during the summer. Additional information is available from the Office of the Registrar.

**Registration Day.** This is held the day before classes begin for both the spring and fall semesters. All matriculated students who did not preregister (or who did not receive a final schedule) must register at Keaney Gymnasium on this day.

**Late Registration.** Students who are unable to register at Keaney will be required to register late, beginning on the first day of classes and continuing no later than the end of the published add period. Such students must pay a \$15 late registration fee and register at the Office of the Registrar.

**Non-matriculated Students.** Such students must apply each semester to the Admissions Office for permission to enroll and for registration instructions. Registration takes place during the first week of classes.

**Payment of Fees.** Arrangements must be made with the Bursar for complete payment of tuition and/or fees. If, at any time during the semester, it becomes apparent that a student has not met his or her financial responsibilities with the University, the registration for that semester is subject to immediate and irrevocable deletion. Class schedules will be issued only for those students who have registered for courses and satisfied payment requirements with the Bursar by the announced due date. Students who have not satisfied payment requirements by the announced due date will have their preregistration class schedules irretrievably cancelled and will be required to register on registration day.

**Drop and Add.** Students are permitted to add courses during the first two weeks of classes.

Any course may be dropped, by official procedures determined by the Registrar, before the second weekday prior to the end of the add period (the third weekday, if the add period ends on Monday). During the two or three days before the end of the add period, a course may be dropped only if another course is simultaneously added. If the student has not dropped a course by the last seven weeks before the last day of classes, the instructor must submit a grade.

It is the student's responsibility to notify the instructor and/or the department by the second class meeting if he or she intends to remain enrolled. Otherwise, the seat may be assigned to another student.

A student may drop a course later than the announced deadline if, at midterm, the student has requested but received no evaluation of his or her work in the course. Such action requires the consent of the department chairperson, or if the chairperson is the instructor, the student may drop the course with the consent of the dean of the college.

**Audit.** An auditor may be admitted to class on a space-available basis with the consent of the instructor as indicated by the instructor's signature on an audit authorization form which must be filed in the Office of the Registrar. The course instructor shall determine the extent to which an auditor may participate in class activities. An auditor's name shall not appear on official class rosters, on the grade report, nor will the course be posted to the student's permanent record.

**Full-time to Part-time.** Students who wish to continue their education as matriculated part-time students must obtain an application from the Registrar's Office prior to the beginning of each semester. The signature of the student's academic dean is required.

A non-matriculated part-time student must obtain an application from the Admissions Office prior to the beginning of each semester. The signature of the Director of Admissions is required. Non-matriculated students may not register until the first day of classes.

**Off-campus Study.** A full-time student who wishes to study at another college or university and use that course work to satisfy graduation requirements at the University of Rhode Island must register for off-campus study with the Registrar to ensure that grades and credits will be accepted. The student must obtain signed approval for the off-campus courses from the dean of his or her college. Off-campus study includes summer sessions, one or two semesters at another American university, or study abroad. A student may not ordinarily study off campus during the senior year. Students who wish to maintain registered status and preregistration eligibility while studying off campus, must register for off-campus study for each semester of absence from the University of Rhode Island campus.

**Student Exchange Program.** Any full-time student matriculated at one of the public institutions of higher education in Rhode Island may enroll for a maximum of seven credit hours of his or her full-time schedule per semester for study at one of the other public institutions at no additional expense. Students will be subject to the course selection process at the receiving institution. Summer session and continuing edu-

cation registrants are not covered under this program.

Information regarding this program is available at the Office of the Registrar.

**Veterans' Educational Benefits.** Information describing these benefits may be obtained from the Office of the Registrar in the Administration Building or from the Veterans Administration representative in the Administration Building.

All veterans who are eligible and who wish to receive VA educational benefits must notify the Office of the Registrar, veterans' section, in person with proof of registration and payment. In order to satisfy Veterans Administration regulations, the University of Rhode Island requires that all students who receive VA educational benefits report any and all changes in their academic status to the veterans' section of the Office of the Registrar.

URI enrollment/attendance verification forms are mailed monthly to all GI Bill recipients and should be returned to the veterans' section of the Office of the Registrar. Failure to complete and return the monthly verification form by the due date will result in an automatic suspension of educational benefits for a period of at least 30 days.

Recipients of VA educational benefits are also governed by the same University policies as all other students and are, therefore, responsible for completing those procedures described in the *Schedule of Courses* for effecting changes of status (adding and dropping courses, changing address, withdrawing from the University, etc.).

The *University Manual*, the *Graduate Student Manual*, and the *Students' Guide to URI* further explain the University's policies and procedures concerning the following: 1) the grading system and standards of progress required of the student by the University and the conditions for dismissal for unsatisfactory grades; the allowed probationary period, and the conditions of reentrance for academically dismissed students (See: *University Manual*, Chapter 8; *Graduate Student Manual*, Appendix A; *Students' Guide to URI*, Section 2). 2) the records of academic progress maintained by the University and furnished to the student (See: *University Manual*, Chapter 8; *Graduate Student Manual*, Appendix C; *Students' Guide to URI*, Section 2). 3) the policies and regulations relating to student conduct and conditions for dismissal for unsatisfactory conduct (See: *University Manual*, Chapters 5 and 6; *Graduate Student Manual*, Appendix A; *Students' Guide to URI*, Section 2).

**Change of Address.** It is the responsibility of the student to complete a change of address form in the Office of the Registrar whenever a change is made in his or her local, campus, or mailing address.

# EXPENSES AND STUDENT AID

## Expenses

*Charges and fees set forth in this bulletin are subject to change without notice.*

The total cost for a year of resident study at the University is about \$4,500 for citizens of Rhode Island and about \$6,600 for out-of-state residents. These figures include \$225 for books and supplies, \$545 for miscellaneous personal expenses, and \$83 for in-state and \$158 for out-of-state travel.

Students commuting to the University from their homes in Rhode Island should anticipate expenses of approximately \$3,800 a year. This figure includes \$225 for books and supplies, and \$2,329 for miscellaneous personal expenses and transportation.

All charges are payable by the semester and are due and payable on receipt of the bill or by the due date indicated on the bill. Checks or money orders should be made payable to the University of Rhode Island.

### Part-time Students

Part-time students, registered for up to 11 credit hours per semester are charged the fees below:

Tuition, per credit hour	
Rhode Island residents	\$44.00

Registration fee per semester	8.00
Memorial Union fee, 1-4 credits	7.50
5-11 credits	15.00

**Resident Student Status.** A student who is a resident of the state of Rhode Island pays the in-state fee, but a student from another state or a foreign country who is in Rhode Island primarily for educational purposes, even though he or she remains in the state during vacation periods, is considered a non-resident and pays the out-of-state fee.

The parents or legal guardians of a minor student must have been residents of the state for one year immediately preceding the first class day of the first term of a student's registration for that student to claim resident student status.

An "emancipated student" must establish the same bona fide residency for in-state tuition exemption. An emancipated student shall mean a student who has attained the age of 18 years, and whose parents have entirely surrendered the right to the care, custody, and earnings of the student and who are no longer under legal obligation to support or maintain him or her. If any of these tests is not met, he or she is presumed to be an unemancipated student. A non-resident student who reaches 18 years of age while a student does not by virtue of that fact alone become a resident student.

Dependents of members of the armed forces, as well as members of the armed forces stationed

<sup>1</sup>See page 21 for exception to this under NEBHE interstate program.

in the state on military orders, are entitled to classification as resident students.

The Director of Admissions classifies each student admitted to the University as a resident or non-resident student on the basis of all relevant information available to him. A student may appeal the decision to the Board of Residence Review. The above information is merely a summary of the regulations governing student classifications for tuition purposes. The complete text of the regulations adopted by the Board of Regents may be obtained from the Office of Admissions.

**Tuition Waiver for Senior Citizens.** Permanent residents of Rhode Island who are 65 years of age or older are entitled to take courses at the University without payment of tuition, although other fees and charges are still applicable. Admission to particular courses will be granted on a space-available basis. Eligible persons should contact the Office of the Registrar.

**New Student Fees.** A nonrefundable fee of \$15 must accompany each application for admission. See page 18 for application procedure.

An advance deposit of \$50 is required from every accepted student. The advance deposit, which is applied on the first term bill, will be forfeited if the applicant later withdraws his or her name.

Students returning after an absence of one or more semesters are subject to the same application fee and advance deposit as entering freshmen.

**General Fee.** All students, both resident and nonresident, pay a general fee of \$872 per year. This fee covers the cost of benefits enjoyed by all students, such as use of library, testing services, guidance, personnel supervision, placement, athletics, etc.

**Student Assessments.** Each student is assessed \$36.50 per year which is distributed by the Student Senate to support a wide variety of student programs and activities. A Memorial Union fee of \$100 per year is also assessed.

**Late Fees and Special Fees.** A late registration fee of \$15 is charged to students whose registration is not completed before the first day of classes.

Expenses for class trips in all courses and those incident to practice teaching in vocational education courses are charged to the students concerned.

**Applied Music Fees.** Students taking performance courses in music are charged an additional fee each semester of \$60 for 0 credit, \$80 for 2 credits, and \$120 for 3 and 4 credits.

**Student Nurses' Fees.** Beginning in the sophomore year, student nurses must purchase authorized uniforms and nursing equipment. The approximate cost is \$175.

**Transcripts.** Each student who graduates from the University is entitled to one official transcript without charge. The fee for all other transcripts is \$2, except that the fee for multiple copies ordered at the same time is \$2 for the first copy and \$.50 for each additional copy. Copies will be mailed in response to written requests only, which should be addressed to the Office of the Registrar.

Transcripts will not be issued to students who have any unpaid financial obligation to the University.

**Health Service Fees.** The health fee of \$110 is mandatory for all full-time undergraduates, all international students, and all full-time graduate students. The University requires that all such students be insured through the University's Student Sickness and Accident Insurance unless evidence of comparable coverage in another plan is provided and the student completes, signs, and returns a waiver card to the Bursar's Office by the announced term bill due date. Part-time students and spouses of students are eligible to participate in the health and insurance plan on an optional basis.

The health fee covers all outpatient care at Health Services with the exception of laboratory and X-ray services. Students must have insurance which covers these services.

**Refunds.** Refunds of payments made or credits against amounts due to the University shall be made to students who officially withdraw according to the following scale: during the first two weeks, 80 percent; during the third week, 60 percent; during the fourth week, 40 percent; during the fifth week, 20 percent; after five weeks, none.

The attendance period in which withdrawal occurs is counted from first day of registration and includes weekends and holidays.

Where the student claims that the application of the above policy causes extraordinary hardship, the student may apply in writing to the respective department head requesting a review of his or her claim. The claim will be referred to a committee made up of the Directors of Student Life, Residential Life, Dining Services, Student Financial Aid and Health Services. All circumstances relating to the request for a variance from the general uniform University policy must be fully documented in the written claim.

The premium for the University Student Sickness and Accident Insurance is not refundable. Coverage extends through August 31 even though the student is no longer enrolled.

**Reassessment of Fees.** Fees are reassessed and adjusted according to the credit enrollment and/or student status resulting from drop/add transactions as processed by the Registrar during the Add Period. Subsequent to the Add Period, term bills are only reassessed for part-time students who add credits. The dropping of credits after the Add Period does not reduce term bills.

**Housing Rates.** Following are the rates for University housing for the year 1980-81. For complete information write to the Director of Residential Life, Roger Williams Commons. All rates quoted are for double rooms. For single rooms, where and when available, \$60 per year is added to the double rate. Board is mandatory for students living in residence halls.

#### *Residence Halls*

\$1,203 Adams, Barlow, Bressler, Browning,  
Hutchinson, Merrow, Peck, Tucker, Wel-  
din  
\$1,261 Butterfield

\$1,320 Aldrich, Burnside, Coddington, Dorr, El-  
lery, Fayerweather, Gorham, Heathman,  
Hopkins

The average projected room rate (including social fees) for fraternities and sororities for 1980-81 is \$1,016. The average projected board rate for fraternities and sororities is \$491.50 per semester.

**Housing and Dining Contract.** University housing is contracted for the entire academic year. A deposit of \$100 is required at the time of filing application for a room in the residence hall. This deposit will be applied on the first semester bill. A cancellation of the housing application will result in a pro rata credit on the semester bill according to the following schedule: from date of deposit to June 15, \$100; from June 16 to the opening of the residence halls for the academic year, \$62; after that time, no refunds will be made.

All residence hall rates are quoted for the

period specified in the contract. Payments are due in full by the published term bill due date each semester or upon receipt of bill from the Office of Residential Life. Checks and money orders are payable to the University of Rhode Island and should be remitted to the Office of the Bursar.

A student vacating his or her assigned quarters before the end of the period under contract will be held responsible for the total charges for the entire period. No refund will be given when a student moves from University quarters to a private home or decides to commute.

All students living in University residence halls are required to purchase a 15-meal contract for three meals a day, Monday through Friday, for \$443 per semester. A 20-meal contract of \$521 per semester for three meals a day, Monday through Saturday; brunch and dinner on Sunday are available at the student's option.

Dining contracts begin on registration day and expire the last day of final examinations. They apply each day on which the University schedules classes or examinations according to the meal plan purchased. Meals are not served on holidays.

Students who require diets for health reasons must have their local physician submit a request for the special diet, with the diet prescribed, to the director of Clinical Services, University Health Services, each semester. Special diets for other than health reasons cannot be provided.

Parents and guests of students, faculty and staff members, alumni, and guests of the University may purchase guest meal tickets at the dining rooms, or may use student guests coupons from student meal books. Various meal plans are available for commuting students on a semester contract basis. Information is available at the Dining Services Office.

Meal books are issued at registration and billed according to the contract signed. Only students withdrawing from the University will receive Dining Services refunds. Please refer to scale on page 24.

**Indebtedness to the University.** Failure to make full payment of all required fees or to resolve other debts to the University (for example, unreturned athletic equipment, overdue short-term or emergency loans, lost library books, debts to the Office of Residential Life for damages, unpaid resitutions required by the University Judicial System) may result in the cancellation of preregistration for the following semester, denial of registration until the payment is made, and/or disenrollment. Appropriate University departments will provide the student with notice of the debt, reason for it, and a review, if requested. A student must fulfill all financial obligations to the University before receiving transcripts or a diploma.

## Student Financial Aid

Financial aid to students is awarded without regard to age, race, sex, creed, national origin, or handicap.

The University offers financial aid so that students are not denied the opportunity to pursue higher education because of a lack of funds. All financial aid is administered on the basis of financial need, which is figured as the cost of attendance at the University minus the contribution expected from the family unit.

The University of Rhode Island uses the services of the Basic Educational Opportunity Grant Program. The BEOG Student Eligibility Report, in addition to announcing a BEOG award, presents an analysis and summary of the financial strength of the student's family and enables the Student Financial Aid Office to determine how much the family can afford to contribute toward the cost of university attendance. Using this information, the Student Financial Aid Office attempts to meet the financial needs of all students who apply.

There is a large variety of financial aid programs which may be awarded only after a student has applied for a Basic Educational Opportunity Grant and has submitted a BEOG Student Eligibility Report to the Student Financial Aid Office.

A list of the scholarships and loans may be found on page 212.

**Application Procedure.** All entering students seeking financial aid should obtain a Financial Aid Form (FAF) from their high school guidance counselor, or from the Student Financial Aid Office at the institution they are presently attending. The FAF should be completed and mailed to the College Scholarship Service, Princeton, New Jersey after January 1 and prior to March 1.

The FAF is used to apply for the Basic Grant as well as for the Rhode Island Higher Education Grant and Scholarship Programs. All students applying for financial aid must apply for the Basic Grant and submit the BEOG Student Eligibility Report to the Student Financial Aid Office. The Student Eligibility Report should be submitted to the Student Financial Aid Office even if the student is ineligible for a Basic Grant.

Students currently enrolled at the University may pick up forms at the Student Financial Aid Office, Roosevelt Hall.

## University Aid Available to Students

**University Grants-in-aid.** The University provides grants to several hundred students. To be awarded a University grant, the student must have demonstrated financial need and a satisfactory academic record.

**University Employment.** Jobs funded by the University are available to several hundred students. Job listings and application forms are available at the Student Financial Aid Office.

**University Loans.** Emergency loans of from \$10 to \$100 are available to students. These loans are designed to meet only financial emergencies. They are short-term in nature (15-90 days), and can be made only when there is a means of repayment. All emergency loans must be repaid by May 15. Application forms are available at the Student Financial Aid Office.

**State Aid Available to Students.** Many states offer scholarship and grant assistance. A student should ask his or her high school counselor for information regarding state student assistance programs or write or call the state department of education for information.

**Rhode Island State Student Assistance.** In the state of Rhode Island, the Higher Education Assistance Authority offers two types of assistance, the Rhode Island State Grant and the Higher Education Scholarship Program. These programs are available to Rhode Island residents who have financial need as determined through the filing of the Financial Aid Form. The stipend is a minimum of \$250 and a maximum of \$1500 per year. The grant is given to a student based only on financial need, whereas the scholarship is based on financial need and the CEEB Scholastic Aptitude Test scores. For more information, please write to Rhode Island Higher Education Assistance Authority.

### **Federal Aid Available to Students**

**Basic Educational Opportunity Grant (BEOG).** Basic Educational Opportunity Grants are made to students in amounts up to \$1,600, but never exceed half the cost of attending the University. The amount that is awarded is determined by the need of the student and the level of federal funding for the year.

**Supplemental Educational Opportunity Grant (SEOG).** These grants are made to students in great financial need. Only those students who would be unable to pursue their course of study without this additional assistance are awarded a SEOG grant.

**National Direct Student Loans (NDSL).** These loans are funded by the federal government and the University. The amount of the loan is determined by the student's need and by the amount of federal money received by the University. No interest is charged and repayment is not expected while the borrower is a "half-time" student or better in college or graduate school, and for nine months after the completion of studies.

Repayment may be deferred for up to three years while the borrower is in the Peace Corps, VISTA, or in military service. When repayment becomes due, there is an interest charge of three percent per year. If necessary, repayment may be made over a ten-year period; the minimum repayment rate, however, is \$30 per month. There are provisions in the loan for cancelling all or part of the repayment if the student performs certain types of teaching, or military service in a combat zone.

**Nursing Student Loan/Scholarship Programs.** This program is available to students enrolled in the College of Nursing. The loan becomes due and payable should the student leave the nursing program for any reason. When repayment becomes due, there is an interest charge of three percent a year.

Federal Nursing Scholarships are available to students in great financial need.

**Health Professions Loan Program.** This loan is restricted to students in the College of Pharmacy. Loans are available to all such students in financial need. There is an interest charge of seven percent per year. This is charged only when the student is in repayment status, that is, when the student is no longer pursuing advanced professional training.

**College Work-study Program (CWSP).** This federally supported program provides part-time employment during the academic year and full-time employment during vacation periods. The jobs may be either with University departments, or with off-campus, non-profit, non-sectarian, non-political agencies. Other institutionally funded employment is also available. A list of these jobs is available in the Student Financial Aid Office. (Limited funding could curtail the summer employment program.)

**Guaranteed Student Loan Program.** Loans are made to students by participating lending institutions in their home areas. Program particulars vary from state to state. The maximum amount available ranges from \$1,500 to a possible \$2,500 per year, depending on the state of residence and year in college. Repayment is not expected until after graduation, unless the borrower ceases to be enrolled on at least a "half-time" basis.

Under most circumstances, the federal government will pay the interest on a Guaranteed Student Loan. The federal government pays the seven percent interest while the student is in school, provided that (1) the family's adjusted income is less than \$25,000 (with no "needs analysis" necessary); or (2) the family's adjusted income is above \$25,000, but a "needs analysis" indicates financial need.

For other information on named scholarships see page 212. For veterans' benefits see page 22.

# STUDENT LIFE AND SERVICES

---

An enriching college life has a well-balanced mix of academic and extracurricular activities. The University offers a unique blend of student organizations and activities with emphasis on student-run services and businesses.

## New Student Orientation

Orientation programs which facilitate the students' entry into the campus community are administered by the Office of Counseling and Student Development. New students are taxed a nominal amount to cover such expenses as room, meals and materials associated with their orientation program.

**Summer Orientation Workshops.** All student who are beginning University careers attend a two-day workshop to plan their academic programs, to register for fall classes, to learn what to expect of the University, and to begin to acquire the skills essential to successful transition from high school and home to the University community. These programs are planned to personalize the student's first experience with the

University as each one participates, with a group of approximately 15 classmates, in workshop projects. Admitted students receive workshop registration materials in May.

Special programs are planned for parents of new students to coincide with one of the workshop dates.

**Transfer Orientation Programs.** Students transferring to the University from another institution are encouraged to attend workshops planned especially to acquaint them with some of the unique features and procedures of this University. These workshops differ substantially from beginning student programs. They deal with the issues and problems associated with transferring from another educational institution to the University of Rhode Island. Students admitted with advanced standing receive orientation information and reservation materials in May for the June and July workshops and in early January for mid-winter orientation.

**Initial Orientation for International Students.** Programs just prior to the formal beginning of the academic year assist the international student to function effectively, comfortably, and with reasonable initial success in the new environment. Because successful transition to American culture, values, and institutions as well as to American academic life is crucial, new international students are required to attend the program. Full information regarding arrival dates and orientation program costs are mailed to students in the spring. In planning educational budgets, international students should set aside \$75 to cover cost of room, meals and program expenses. This expense is in addition to University fees specified in this bulletin.

## Life Styles

**Residence Halls and Dining Centers.** Residence halls and boarding facilities are available to students during both the regular academic year and the Summer Sessions. There are 19 residence halls on campus offering a variety of living accommodations including coeducational housing. Students registering for rooms in the residence halls will have their applications filled in order of receipt. Room assignments will be to the extent of facilities, and roommate requests will be granted when possible. Freshmen are guaranteed space in residence halls if they send in their housing deposit on time. For rates and contracts, see page 25.

Applications for residence hall living should be made to the Director of Residential Life.

Three dining centers are operated by the Uni-

versity for the convenience of resident students. These centers were constructed with private bond funds. To guarantee payment, the University requires all students living in residence halls to purchase a 15- or 20-meal dining contract as described on page 26.

**Fraternities and Sororities.** There are approximately 1,300 fraternity and sorority members living in the 22 nationally-affiliated houses privately owned by alumni corporations. The staff of the Department of Student Relations advises these groups. The Greek houses promote scholarship, citizenship, and small-group living. Within the last 13 years, 12 new houses have been built on campus. Purchasing and business management for these houses is provided by a private corporation controlled by the fraternity and sorority members. The average room and board charges for fraternities and sororities is approximately \$75 less than for University residence halls and dining centers. Approximately 175 freshmen live in fraternities and sororities each year. Interested freshmen should contact the Department of Student Relations.

**Commuting from Family Home.** Approximately 2000 students commute to the University from home. The advantages of home cooking, privacy, lower costs, and opportunity to keep high school friends are balanced against numerous challenges: acquiring information about all aspects of the University, returning to campus for evening events, transportation problems, and budgeting one's time. Various services are coordinated by the Department of Student Relations to meet commuter needs. Dining Services offers special meal plans for commuters; Health Services provides a satellite clinic of preventive services; the Commuter Association offers numerous programs and a car-pool matching service; the Commuter Information and Referral Center, staffed by peer advisers, is a clearinghouse of information providing quick and accurate answers to any questions about University life.

**Commuting from "Down-the-line."** Approximately 2,000 students commute from houses or apartments in the southern Rhode Island area known as "down-the-line." Juniors and seniors often choose to move off campus and live within a ten-mile radius of the campus where summer homes are rented to students for the school year. Typically, a student will pay \$75 a month, plus utilities, for each bedroom in a furnished house. The majority of winter residents in these down-the-line summer communities are students and they patronize nearby supermarkets, laundromats, restaurants, shopping centers and recreational facilities. Many commute by car-pool or bus.

**Older Students.** Approximately 800 students (10% of the undergraduate population) on the Kingston campus are over 25 years of age. There is a student organization called Older Student Association (OSA) for these men and women who chose not to, or were unable to, attend college right after high school. Some are married, with family responsibilities. Some also have jobs and are part-time students. Some older students are attending school with G.I. Bill benefits. Some have retired from a first career and want to prepare for a second. Older students are encouraged to seek advice from the Admissions Office staff. Programs and services for this group of students are coordinated by the Department of Student Relations.

**Minority Students.** Approximately 300 students use the variety of services for minority students. Black students, native American students, Hispanic students, and other minority students have formed special interest groups to further meet their needs. Services are coordinated by the Department of Student Relations.

**International Students.** More than 200 international undergraduate students, graduate students, and visiting faculty are advised and served by the Department of International Student Affairs. Assistance is provided in the academic, financial, housing, and social areas. All communication from foreign students concerning applications for admission to undergraduate or graduate programs, non-immigrant visas, and employment are handled by this office.

**Handicapped Students.** Handicapped students are encouraged to notify the University Committee to Meet the Needs of the Handicapped (c/o University Health and Safety Office) of the nature of their handicap before their arrival on campus. Services for handicapped students are coordinated by this committee. Group activities and organizations are coordinated by the Department of Student Relations.

## Student Government

The Student Senate is a legislative body which represents the students to the administration and faculty and supervises extracurricular activities. It also distributes the activities tax among the various student organizations through its tax committee. Individual residence halls form their own governments. The Interfraternity Council supervises fraternity affairs and the Panhellenic Association governs sorority life. The Commuter Association provides social and other assistance to commuter students.

## University Judicial System

Administered by the Department of Student Relations, the University Judicial System is designed to promote student growth and to preserve the atmosphere of learning necessary to the well-being of all students. Community standards of behavior and University policies for students are published in the student handbook, *Rampages*. The Judicial System receives complaints or allegations from aggrieved parties, the available facts are gathered and evaluated, and the case may be referred for formal judicial action by one of the University judicial boards or by administrative action (if the student admits guilt and chooses administrative action). Sanctions range from "no further action" to suspension or dismissal from the University and may include conditions relating to the nature of the violation.

## Student Activities

More than 120 student organizations are advised by the Student Activities Office staff through consultation services, technical expertise and information. Thousands of students participate in the activities sponsored by these organizations.

**Lectures and Arts Programs.** Lectures and arts programs are presented throughout the year to enrich the more formal academic program of the University. Lectures of general and specialized interest are presented by visiting scholars. The Arts Council, on which faculty, students, and administration are represented, plans programs that include music and dance concerts, film programs, and theatre presentations. Student organizations sponsor a popular entertainment series and bring speakers of national or international prominence to campus. These are supported by student funds.

**Student-run Businesses.** The Student Senate business arm, called Kingston Student Services, controls and operates a variety of student-oriented businesses from a record and film shop in the Memorial Union and the campus youth hostel (primarily for commuters) to a used book exchange. Other student-controlled businesses include the fraternity and sorority cooperative buying service and the various residence hall cooperatives for purchase of food and sundry items, and management, with some full-time help, of the multi-thousand-dollar food services in the Memorial Union.

**Athletics.** The University offers an extensive program of athletics, sufficiently varied to pro-

vide an opportunity for every student to participate. The Tootell Physical Education Center and the Keaney Gymnasium provide excellent facilities, including three pools, three gymnasiums, three weight training rooms, and a modern athletic training room. A bubble air structure covers an indoor track and is connected to the Keaney building. The outdoor facilities include the newly renovated Meade football stadium, 21 tennis courts, two softball diamonds, a baseball field, a lighted lacrosse/soccer field, a new all-weather track, a field hockey field and numerous practice fields for recreation and competitive activities.

Men's intercollegiate teams participate in baseball, basketball, football, golf, riflery, sailing, soccer, swimming, tennis, cross country, indoor and outdoor track and wrestling.

In addition to membership in the Eastern Athletic Association, the University holds membership in the Yankee Conference (football) and the National Collegiate Athletic Association.

The women's intercollegiate teams participate in basketball, fencing, field hockey, gymnastics, lacrosse, softball, swimming and diving, tennis, volleyball, cross country, indoor and outdoor track, and sailing. URI holds membership in the Association of Intercollegiate Athletics for Women, the Eastern Association of Intercollegiate Athletics for Women, the women's affiliate association of the Amateur Fencing League of America, the New England Women's Intercollegiate Sailing Association and the college divisions of the United States Field Hockey and Lacrosse Associations. The expansion of women's athletic programs provides opportunity for a high level of competition for exceptional female athletes on both the regional and national level.

Intramural programs for men and women combine the values of competitive athletics and informal sports, and are in operation all year.

Those with sports interests may join the several clubs identified with particular sports.

**Honor Societies.** The University has chapters of a number of national honor societies, election to which is a recognition of accomplishment. The Society of the Sigma Xi is the scientific honor society, Phi Beta Kappa is a national liberal arts honor society, Phi Eta Sigma is a national honor society for freshmen, Phi Kappa Phi is the honor society for general scholarship and Mortar Board recognizes scholarship and leadership. In more specialized areas are the following: Alpha Kappa Delta (sociology), Alpha Zeta (agriculture), Beta Alpha Psi (accounting), Beta Gamma Sigma (business), Kappa Delta Pi (education), Delta Pi Epsilon (business education), Eta Kappa Nu (electrical engineering), Lambda Tau (medical technology), Omicron Delta Epsilon (econom-

ics), Omicron Nu (home economics), Phi Alpha Theta (history), Phi Sigma (biological science), Phi Sigma Iota (foreign languages, literature, and linguistics), Pi Delta Phi (French), Pi Mu Epsilon (mathematics), Pi Sigma Alpha (political science), Pi Tau Sigma (mechanical engineering), Rho Chi (pharmacy), Sigma Delta Pi (Spanish), Sigma Pi Sigma (physics), and Tau Beta Pi (engineering).

**Other Organizations.** In addition to intercollegiate athletic teams, a number of organizations represent the University in competition, exhibitions, and public performances. The University Band, Chorus, and Orchestra are under music department direction, and students may receive credit for participation in any one of these. The University Theatre, under theatre department direction, presents several plays each year. The URI Debate Council is directed by members of the speech department and partici-

pates in intercollegiate debates. The Cheerleaders are active at varsity football and basketball games and rallies.

On campus there are about 30 professional organizations related to the academic areas and there are a number of groups serving social, recreational, cultural, and political interests.

Students publish a newspaper four times a week, a bi-weekly gazette, a yearbook, and a literary publication, and operate WRIU, a statewide AM-FM radio station.

## Student Services

**Career Services.** The Office of Career Services assists students to understand themselves, to understand the relationship between their education and career choices, to discover and develop alternatives and finally, to make the transition from the academic environment to the

working world. It provides individual counseling, developmental career groups and workshops. A Career Resource Center has information on specific careers, job-search strategy, job openings, employer literature and graduate schools. The office coordinates the on-campus recruiting program and makes other employer listings available to all students as well as alumni.

**Counseling Services.** The Office of Counseling and Student Development helps students relate their personal paths of development to the intellectual and interpersonal experiences they encounter in the University setting. The staff of this office works to keep education at a personal, individual level by offering assistance to students in choosing a field of study; developing effective study habits; coping with crises; building satisfying relationships with faculty, staff, and other students; making the transition to the University environment; solving emotional problems, or planning for graduate school or a career.

The staff is made up of counselors, psychologists, psychiatrists, and educational specialists who have a wide variety of experience working with students, both individually and in groups. In addition to direct counseling services, the staff offers a variety of programs designed to develop essential life skills, to examine crucial life themes, or to make successful life transitions.

University chaplains and religious advisers of various faiths are also available to all students. Religious organizations meet for worship and study, and sponsor other activities throughout the academic year.

**Memorial Union.** A student board of directors working with the Director of the Memorial Union determines policy for the Union and plans a full program of social, cultural, intellectual and recreational activities. The Union building is a memorial to the men of the University who died in two world wars. It houses a wide variety of educational, social, cultural and recreational services and facilities. These include meeting and conference rooms, lounges, browsing room, study rooms, dark rooms, student video center, radio station, campus newspapers, games room, offices for student organizations, student technical services, craft center, cafeteria, snack bar, restaurant, pub, private dining rooms, ballroom and party room.

Among the services provided are a full service bank, travel agency, unisex hair salon, credit union and a center where copying facilities and typewriters are available.

**Health Services.** The University Health Services

is open to all students who have paid the health fee. Outpatient services in the Potter Building include limited emergency treatment, special clinics in gynecology, birth control, urology, internal medicine, surgery, wart removal, allergy, nutrition, and mental health. There is also a laboratory as well as X-ray and pharmacy facilities. Allergy injections are given, provided the vaccines are supplied.

The Health Education Department of Health Services in Roosevelt Hall is concerned with teaching students to take care of themselves and to become informed consumers of health-care services. It is open Monday through Friday, 8 a.m. to 4 p.m. Outpatient services during the academic year are available seven days a week, 24 hours a day. Physicians are available Monday through Friday from 8 a.m. to 8 p.m., and for a weekend clinic. Physicians are on call at other times. Nurses are on duty at all times. Specialists are available only at limited times.

Hospital care is available in the local community. All medical expenses incurred outside the University's Health Services are the responsibility of the student. Students who choose their own private physician must assume responsibility for expenses incurred.

## Confidentiality of Student Records

Procedures for the release and disclosure of student records maintained by the University are in large measure governed by state and federal laws. Where the law is silent, the University is guided by the principle that the privacy of an individual is of great importance and that as much information in a student's file as possible should be disclosed to the student upon request. A current or former student has the right to inspect and review official records, files and data directly related to that student. This right does not extend to applicants, those denied admission to the University or those who were admitted but did not enroll. Some records are not available to students.

A student may challenge the factual and objective elements of the content of student records, but not the qualitative and subjective elements of grading. Third parties do not have access to personally identifiable records or information pertaining to a student without the written consent of the student who specifies that the records be released. Parents are considered third parties.

Detailed guidelines for the release and disclosure of information from student records are available from the Department of Student Relations and Research. These guidelines comply with the legal requirements of the Family Educational Rights and Privacy Act of 1974.

# UNIVERSITY COLLEGE

---

Diane W. Strommer, *Dean*

All entering students are enrolled in University College except those students in special two-year programs such as Dental Hygiene and Commercial Fisheries and registered nurses wishing to earn a bachelor's degree.

University College grants no degrees but offers all incoming students an opportunity to explore the variety of courses and programs open to them at the University before committing themselves to one program of concentration in a degree-granting college. Those students who have a clear educational or professional objective when they enter the University are encouraged to pursue that objective as directly and rapidly as possible.

The University College experience is based on a strong academic advising program. Advisers, who have regular office hours at the college, are drawn from the faculties of each of the degree-granting colleges. Each student is assigned an academic adviser who is a specialist in the area which the student plans to pursue. The adviser helps the student select and schedule the right courses, become familiar with procedures, ob-

tain such support services as may be needed and, when the student is ready to do so, transfer to a degree-granting college.

If more students seek access to a program than can be accommodated due to limited facilities or faculty, those students who have shown the highest promise for academic success in the program will be admitted first. Where such limitations exist, the student must apply for acceptance in the program under conditions established by the specific department or college. This applies specifically to programs which have been declared "over-subscribed" by the Vice President for Academic Affairs. Students who cannot be admitted to the program of their first choice may request entry into another program for which they have satisfied entrance requirements, or spend one or two additional semesters in University College preparing to qualify for another program.

**Special Program for Talent Development.** This program, administered by University College, has as its primary concern young people who could not go to the University without the program's assistance. For further information about it see page 21.

**Study Abroad Office.** The Study Abroad Office is under the auspices of University College. Its function is to assist students in planning courses of study in foreign countries, as well as travel and living arrangements.

# COLLEGE OF ARTS AND SCIENCES

---

Barry A. Marks, *Dean*  
Margaret D. Robb, *Associate Dean*  
Gerry S. Tyler, *Associate Dean*  
Donald J. Farish, *Assistant Dean*

The objective of the College of Arts and Sciences is to enable students to understand our intellectual and spiritual heritage, the physical and biological world in which we live, and our social, economic, and political development. Beyond this, the college provides several programs of professional training and a strong foundation for graduate study. In all its functions the college is dedicated to fostering a spirit of inquiry and independent thought. Emphasis is placed upon intellectual growth and the deep satisfaction derived from knowledge for its own sake.

The college has programs of study leading to the following degrees: Bachelor of Arts, Bachelor of Science, Bachelor of Fine Arts, and Bachelor of Music. The Department of Dental Hygiene provides programs leading to both the Bachelor of Science and the Associate in Science degrees.

For information about preprofessional preparation, see pages 12-14.

## HONORS PROGRAMS

Comprehensive honors programs are available for especially qualified junior and senior students. Eligibility depends on the quality of academic achievement during the previous two years. Qualified students may assist in research projects related to their major interests, enjoy graduate student privileges at the University libraries, and take graduate courses during their senior year. Honors programs are available in anthropology, biology, botany, chemistry, computer science, economics, English, geography, geology, history, journalism, languages, mathematics, microbiology, music, philosophy, physics, political science, psychology, sociology, speech, and zoology.

## Curriculums

**Distribution Requirements.** The 45 distribution credits are earned in Division A, humanities; Division B, natural sciences and mathematics; Division C, social sciences. At the student's option, 18 credits are taken in one of the divisions, 15 in another, and 12 in a third.

The fourth area, Division D, communications, is optional. A student may take up to 9 credits in Division D as part of the 45-credit total, but may not reduce any other divisional requirement by more than 3 credits.

Within each of the four divisions, no more than two courses may be taken for distribution credit in one department (discipline) or subject matter area.

To eliminate academic loads above the degree requirements, students in the advanced ROTC program may, with the approval of the dean of the college, apply a maximum of 6 credits of military science courses to reduce the distribution requirements.

Courses offered in the student's concentration department may not be used for distribution credits, except that students presenting a double concentration may apply courses from one concentration towards the college distribution requirements.

**Concentration.** Any student who has met the requirements for two separate concentrations within any single bachelor's curriculum has earned a double concentration and may have both fields listed on the transcript.

The students must maintain a 2.0 quality point average (QPA) in their concentration to meet graduation requirements. One half of the total number of credits needed in a given concentration must be earned at the University of Rhode Island.

**Curricular Modifications.** In exceptional cases, and subject to the approval of their department and of the dean, students may modify any curricular requirement except those for distribution, course level, minimum grade point average, and total credits. These may be modified only by the appropriate committees of the college.

**Area of Interest — Optional.** Students may elect to declare an area of interest which will appear on their transcripts as a category separate from their concentration. Credits may be drawn from any combination of concentration, distribution, electives, and course-level categories. An area of interest may be defined as (1) the completion of 18 or more credits offered within a department and approved by the department chairperson, or (2) the completion of 18 or more credits of related studies offered by more than one department and approved by a member of the faculty competent in the area of interest and the dean of the college.

*Examples of such interdisciplinary areas of interest are Child Psychology, Music Merchandising, Public Relations, Renaissance Civilization, and Black Studies. It is the responsibility of the student to declare his or her area of interest no later than the beginning of the semester when graduation is expected. Students need not declare an area of interest.*

**Electives.** The student will elect courses sufficient in credits to complete the 120 required for graduation. Courses may be taken in any college of the University.

**Course Load.** No student may take more than 19 credits per semester without permission from the adviser and the dean.

**Graduation Worksheet.** It is the responsibility of the student to submit a graduation worksheet, signed by his or her adviser, no later than the beginning of the semester he or she expects to graduate.

## Bachelor of Arts

The Bachelor of Arts curriculums provide a general cultural background and an opportunity for the student to concentrate in any one of 28 fields of study.

**Curriculum Requirements.** Each candidate for a Bachelor of Arts degree must meet certain minimum curriculum requirements having to do with quantity and quality. These requirements include the completion of at least 120 passed credits averaging, at graduation, C or better. On the University's grading system, this represents a cumulative quality-point average of 2.0 or higher. Of the 120 passed credits, at least 42 must be in upper-level courses, numbered 300 or above.

In addition to meeting the college distribution requirements, each candidate must complete a concentration and a number of elective courses. The concentration totals 27 to 30 credits.

**B.A. Concentration.** The concentration is the discipline or subject area in which the degree is granted. It may include not only required courses within the concentration department but also courses in related subjects offered by the student or required by the department. The student should declare this concentration before the end of the fourth semester.

The concentration comprises no fewer than 27 nor more than 30 credits. These, however, are exclusive of any credits which are outside the concentration department but may be required

by that department as prerequisites. Including such prerequisites, the concentration may not exceed 36 credits.

The student may earn up to 45 credits in course work offered by the concentration department, counting as electives those credits earned in excess of the concentration requirements. Any credits in excess of 45 earned in the concentration department increase correspondingly the minimum number of credits required for graduation.

*Concentration areas include: anthropology, art (history and studio), biology, chemistry, classical studies, economics, education, English, French, geography and marine affairs, geology, German, history, Italian, journalism, Latin American studies, linguistics, mathematics, music, philosophy, physics, political science, psychology, Russian, sociology, Spanish, speech, theatre, urban affairs (urban social processes, policy formation, and spatial development).*

**Modified Concentration.** In consultation with the adviser, and with the approval of the dean, a student may be permitted to modify the normal requirements of the department in which the student is concentrating. With such approval, the program, consisting of no fewer than 27 nor more than 30 credits, will constitute the student's concentration.

## Bachelor of Science

The Bachelor of Science curriculums are professionally oriented and, in general, meet the accreditation standards of national professional associations.

**Curriculum Requirements.** The general curriculum for the Bachelor of Science degree consists of the college distribution requirements, 12 credits of free electives, and a major of 30-45<sup>1</sup> credits within a department. In addition, a department may require for its concentration certain courses in other departments, with the stipulation that this will not preclude their application to the distribution requirements. Courses in the concentration department cannot be used to satisfy the distribution requirements. No more than 130 credits can be required in a program.

Each concentration within the B.S. curriculum has certain more specific requirements, as listed on the following pages.

<sup>1</sup>The student concentrating in chemistry, for ACS accreditation purposes, will be allowed 48 credits.

*Concentration areas include:* botany, chemistry, computer science, dental hygiene, geology, mathematics, medical technology, microbiology, physics, zoology.

## Bachelor of Fine Arts

The curriculums provide the opportunity to discover and develop creative capacities in the fine arts. The emphasis is on richness of program and quality of experience rather than the development of isolated skills. Applicants registering for work toward the Bachelor of Fine Arts degree must receive permission of their concentration department. Students concentrating in theatre specializing in scene design must submit portfolios. Theatre students who wish to specialize in acting must arrange for an audition with the Department of Theatre. Others must arrange for an interview with a departmental representative. Further details and appointments may be obtained through the University Admissions Office.

**Curriculum Requirements.** All candidates for the Bachelor of Fine Arts degree are required to select and pass 45 credits in distribution.

*Concentration areas include:* art, theatre.

## Bachelor of Music

The Bachelor of Music Degree is designed to prepare qualified students for careers in the field of music. Students may select one of seven areas of concentration dependent upon their aims and abilities.

*Concentration areas include:* classical guitar, voice, piano or organ, orchestral instrument, music history and literature, theory and composition, music education.

All areas provide for a good background in academic subjects and each curriculum contains basic courses for the development of sound musicianship. An audition conducted by members of the music department staff is required for permission to register for work toward the Bachelor of Music degree.

Concentration in the music education curriculum includes courses in educational psychology, methods, and a teaching internship which leads to state certification for teachers.

The total number of credits for graduation is 125 (126 for music education majors).

**Curriculum Requirements.** All candidates for the Bachelor of Music degree are required to select and pass 45 credits in distribution.

Students concentrating in music education may include six credits in music to meet Division A requirements, and three credits in psychology and six credits in education to meet Division C requirements.

Students are encouraged to attend department-sponsored events each semester.

## Associate in Science

The Department of Dental Hygiene offers a two-year program leading to the Associate in Science degree. The student in this curriculum is not required to meet distribution requirements but must complete 71 credit hours in a prescribed program outlined in the department offerings.

## Anthropology

The Department of Sociology and Anthropology offers the degree of Bachelor of Arts (B.A.) in anthropology.

*Faculty:* Associate Professor Gelles, chairperson. Professor Poggie; Associate Professors Loy, Pollnac and Turnbaugh; Assistant Professors Guthrie and Lynch.

Students desiring to concentrate in anthropology must complete a total of 30 credits in that subject. This total must include at least one course (3 crs.) from each of the sub-disciplines of anthropology as follows: *Cultural Anthropology* includes APG 203, 309, 321, 322, 323, 324, 326, 405, 407, and 411; *Culture Areas* include APG 305, 311, 313, 315, and 319; *Physical Anthropology* includes APG 201, 301, and 412; *Archaeology* includes APG 202, 303, and 317; *Anthropological Linguistics* includes APG 200 and 409.

In addition, each student majoring in anthropology must complete APG 401 (3) and 402 (3). The remaining 9 credits may be selected from course offerings in anthropology.

It is recommended that the first course in each sub-discipline be at the 200 level. These 200-level courses are prerequisites for upper division courses in the sub-disciplines, although prerequisites may be waived by the instructor.

Therefore, the number of students concentrating in computer science enrolled in the College of Arts and Sciences will be limited to 35 per year. University College students and students in other curriculums will be considered for admission to the College of Arts and Sciences as computer science concentrators each January. Selection will be based upon cumulative grade point average.

A registration priority is in effect for all computer science courses. Preference is given to computer science majors, followed by students whose curriculum requires computer science, followed by all others. Students who have pre-registered for computer science courses will be given preference, within the above constraints, regardless of their curriculum. Therefore, pre-registration is strongly recommended.

**Faculty:** Professor Cain, chairperson. Professors J. J. Fisher and Hermes; Associate Professors Boothroyd, Frohlich and Tynan; Lecturer Sage.

### BACHELOR OF ARTS

Students selecting this field of concentration must complete a minimum of 30 credits in geology, including GEL 103 (3), 106 (1) and 104 (3). GEL 105 (ESC 105), normally may not be included.

The B.A. curriculum provides more flexibility than the B.S. program in the choice of courses and offers the possibility of highly individualized programs in consultation with the fa-

culty adviser. The B.A. curriculum can provide an appropriate background for geology-related fields dealing with resources, environmental studies, conservation, management, and others. Students intending to pursue graduate studies in the geosciences should consider the B.S. curriculum in geology.

Students interested in earth science teaching should contact the Department of Geology for details of a cooperative program with the Department of Education.

## BACHELOR OF SCIENCE

This curriculum is designed as a basic foundation in the earth sciences. It offers preparation for further work in areas such as sedimentology, coastal geology, petrology, geochemistry, geophysics, paleontology, paleoecology, mineral and energy resources, engineering geology, environmental geology and oceanography.

An emphasis in marine geology is possible by taking, in addition to marine-oriented geology courses, approved geology-related courses offered by the Graduate School of Oceanography and the Department of Ocean Engineering as science electives. Information about this and other similar options can be obtained from the chairperson of the department.

Students concentrating in geology should note the requirement for field experience. An approved summer field camp for a minimum of 4 credits normally is undertaken following the junior year, and related costs are the responsibility of the student. Minimum background for field camp normally includes GEL 320, 321, 370 and 450. (Field camp is not required under the B.A. curriculum.)

A total of 126 credits is required for graduation. Following is the suggested sequence of courses for the first four semesters. Completion of these courses fulfills Division B requirements and satisfies prerequisites for upper-division geology courses. Late concentrators, transfer students and others wishing to modify this schedule should consult their geology faculty adviser.

## BACHELOR OF ARTS

Students in this curriculum may tailor a program to suit their individual needs and interests. They should meet with their adviser no later than the end of the first semester of the sophomore year to plan a complete program. This program, and any subsequent changes in it, must be approved by the adviser and the department chairperson. It must contain at least 30 credits in mathematics, and include MTH 141 (3), 142 (3), 215 (3), and 243 (3) as well as two courses at the 400 level.

MTH 107, 108, and 109 are not open to students majoring in mathematics.

## BACHELOR OF SCIENCE

Students in this curriculum may follow the four-year general program in mathematics or select the option in applied mathematics during the junior and senior years.

The general program is designed to include the basic theories and techniques of mathematics. The required courses introduce the student to the principal areas of mathematics, and they provide a foundation for advanced study at the graduate level.

The applied mathematics option is intended for the student who anticipates a career as an applied mathematician or mathematical consultant with an organization such as an industrial or engineering firm or a research laboratory. The student learns the mathematical ideas and techniques most often encountered in such work, and is trained to solve mathematical problems. Although a theoretical foundation is developed, the emphasis is practical.

The following courses, totaling 12 credits, are required for students in both the general program and the option in applied mathematics: MTH 141, 142, 215, 243. These courses normally should be taken in the freshman and sophomore years. MTH 107, 108 and 109 are not open to students majoring in mathematics.

A student selecting the general program must complete, in addition to the courses listed above, 27 credits in mathematics, including MTH 435, 437, 438 and 6 credits selected from MTH 316, 425, and 462.

Furthermore, the student in the general program must complete a minor concentration of 18 or more credits in one of the following four areas: biological sciences (biology, botany, microbiology, zoology); physical sciences (astronomy, chemistry, geology, physics); social sciences (economics, geography, political science, psychology, sociology); computer science. Six credits in computer science may be counted toward the minor concentration in any of the first three areas. The program must include PHY 213, 285, and 214, 286.

Students selecting the applied mathematics option must complete, in addition to the 12 credits listed above, 30 credits as follows: MTH 437, 438, CSC 201, and 202 (12); 9 additional credits selected from MTH 143, 217, 244, 418, 435, 441, 444, 451, 452, 462, 471, 472; and 9 additional credits<sup>9</sup> from CSC 411, 413, ELE 210, EST 409, IDE 432, 433, MCE 162, 263, MGS 365, 366, 375, 445, PHY 213-285, 214-286, 322, 331, 341.

A student who intends to do graduate work in mathematics is advised to also take MTH 316.

A total of 130 credits is required for graduation.

## Medical Technology

This curriculum, leading to the Bachelor of Science (B.S.) degree, prepares men and women for work in hospitals or medical laboratories. During the first three years, the emphasis is on general education and basic courses in biology, chemistry, mathematics, and physics necessary as background in the applied sciences. The courses of the senior year are taught off campus by the staffs of affiliated hospital schools of medical technology. The senior year is a 12-month program of study and starts soon after completion of the third year of the curriculum, in June or early July. It is taken at one of the following hospitals which are about 30 miles from the main campus of the University: Miriam Hospital, Rhode Island Hospital, St. Joseph Hospital, which are in Providence; the Memorial Hospital of Pawtucket; or the Rhode Island Medical Center in Cranston. The clinical program includes didactic and laboratory instruction in the various areas of medical technology and prepares the student for the national certification examinations.

Applicants to this curriculum should have completed 62-65 credits by June of the sophomore year and should have taken all courses listed below for the first two years. Students are selected by the University Committee on Medical Technology and by program officials of the hos-

<sup>9</sup>To gain experience using mathematics in a variety of applications the student is encouraged to select, in addition to the required nine credits, as many electives from this list as possible.

pital schools. Since the number of students admitted to this professional curriculum is limited, interested students should consult early in their college career with the director so that they will be familiar with the requirements and application procedures. Flexibility in the curriculum permits the student who is not accepted to fulfill requirements for the Bachelor of Science degree in another concentration such as microbiology, zoology, or certain related health sciences.

## Speech Communication

The Department of Speech Communication offers the Bachelor of Arts (B.A.) degree with curriculums in speech communication studies and preprofessional studies in communicative disorders. ## Urban Affairs

The Urban Affairs Program Coordinating Committee offers three concentrations in the College of Arts and Sciences for the Bachelor of Arts (B.A.) degree: Urban Social Processes in the Urban Environment, Policy Formation in the Urban Environment, and Spatial Development in the Urban Environment. The courses that comprise these concentrations are offered by colleges throughout the University.

The Urban Affairs Program is described on page 12.

Students who select one of these three concentrations must complete five courses chosen from the core for the concentration, three or four courses chosen from the remaining courses, and one or two semesters in the Senior Seminar in Urban Affairs. Each of the concentrations requires a minimum of 30 credits.

Students who wish to major in one of these concentrations should consult the appropriate member of the Urban Affairs Program Coordinating Committee for assistance in the formulation and approval of their concentrations.

**Urban Social Processes.** This concentration examines the functions of urban social systems, explores urban social issues which affect the lives of individuals in an urban environment, and investigates individual and systems-change strategies. Students gain an understanding of the systemic forces which act on individuals in urban societies to produce both positive and negative outcomes. Poverty and social class, the welfare system, race, crime, rapid environmental change — all generate social issues which take on particular significance in an urban setting and have a dramatic impact on the lives of urbanites. In addition to a thorough grounding in theory, students are directed toward research and intervention techniques which they may extend, with graduate training, into the social sciences, criminology, social work, community planning, and other urban-oriented fields. Students seeking jobs at the baccalaureate level may work in social agencies (e.g. welfare, youth development, the criminal justice system), the governmental departments which sponsor and monitor these agencies, or specialized educational facilities (e.g. halfway houses, pre-school enrichment programs, alternative high schools).

Students are expected to satisfy the common core requirements. In addition, they must select one of the following courses to satisfy methodo-

logical skills: APG 402; EST 408, 409; PSY 300; SOC 301.

Students are also required to select 4 courses from the following: APG 319; ECN 401, 403; HCF 220, 480; HIS 339, 343; HMG 401; MGT 301; PSC 420, 483, 486; PSY 435; SOC 314, 316, 330, 336, 340, 410, 418, 438; SPE 315. Students are encouraged to arrange for an urban affairs internship.

**Policy Formation.** This concentration identifies the decision-making processes within the metropolis, examines the ways in which public policies are formulated and implemented, and considers ideas about the substance as well as the outcome of the policy-formation processes. An understanding of such decision-making processes requires knowledge of the political, administrative, managerial, planning, and economic aspects of urban life. Students completing the concentration should be prepared for entry-level administrative jobs in government agencies, business firms and community organizations, or for activist careers in politics. They might undertake graduate work in law, public administration, community planning, business, or related disciplines.

Students are expected to satisfy the common core requirements. In addition, they are required to select one course from PSY 300; SOC 301; MGS 201; MTH 451; EST 408, 409; GEG 482; to satisfy the methodological skill requirements. They are also required to select three courses from the following: ECN 342, 401, 402, 403, 464; HIS 323, 324, 339, 340, 341, 343, 363; PSC 460, 466, 483, 495, 498; CPL 410; FIN 341, 396; MGT 321, 422, 423; REN 310; GEG 411, 421, 452, 512; SOC 336, 340, 342, 434, 436. Practicum or internship experience is required in this concentration. It may be obtained through URB 397.

**Spatial Development.** This concentration gives the student an interdisciplinary viewpoint of the spatial structure and environmental character of the city. The curriculum is designed to focus special attention on the arrangement, allocation and interrelationships of human and physical resources. Man's relation to the urban ecosystem is examined in terms of the processes, patterns, networks and activities that produce the spatial and temporal organization of urban communities. Analytical and methodological skills may be acquired from courses in cartography, remote sensing, and statistics. The structure of the concentration should prepare the student to deal effectively with the increasing problems of rapid urban growth and environmental deterioration.

Employment opportunities are available in such activities as urban systems analysis, economic impact studies, cartographic drafting and air photo analysis, industrial location and re-

gional development, and urban environmental problems. Spatial development students should be prepared for work in organizations or agencies that handle questions such as equal allocation of resources, reduction of regional disparities in goods and services, and developing effective alternatives to problems in housing, poverty, pollution, and other human concerns. These organizations can be in either the private or the public sector.

Students are expected to satisfy the common core requirements. In addition, they are required to select one course from EST 408, SOC 301, GEG 482 and a course from GEG 421, PLS 343 and ESC 301 to satisfy the methodological skill requirements. They are also required to select three courses from the following: HIS 399; CPL 410, 434, 520; ZOO 262, HMG 340; FIN 341; PSC 460; 466; SOC 434; ECN 402; GEG 512; INS 313; BSL 333; CVE 315; EGR 204. Students are encouraged to acquire an internship experience.

## Women's Studies

This new interdepartmental program in the College of Arts and Sciences leads to a Bachelor of Arts (B. A.) degree in Women's Studies. The aim of the program is to provide an option for students who are interested in the interdisciplinary study of the culture and experiences of women.

The Women's Studies program requires 30 credits for a concentration. Four required courses are: WMS 200; a statistics (e.g., EST 220, PSY 300) or methodology course (e.g., ENG 310, SOC 301, SPE 304) approved by the Advisory Committee; WMS 300; and WMS 400. Six courses to complete the concentration may be selected from the following: ART 280 (Topic: Women in Art), ENG 360A, 360B, 360C, 385, HCF 330, 430, 432, 505, 559, HIS 118, 145, 347, HMG 320, NUR 150, PSY 480, SOC 312, 342, 513, SPE 310 (Topic: Rhetoric of the Women's Movement), and SPE 420 (Topic: Rhetoric of Early Women Suffragists). In addition to this list, there are special courses offered by various departments each year which may also be selected with prior approval by the Advisory Committee.

The Women's Studies Advisory Committee also strongly recommends that concentrators take an additional 18 credits in a specialized area as an "area of interest."

# COLLEGE OF BUSINESS ADMINISTRATION

---

Richard R. Weeks, Dean  
John R. Wish, Associate Dean  
Hilda A. Allred, Assistant Dean  
Everett T. Harris, Assistant Dean/Administration

The 13 curriculums in the College of Business Administration allow the student to develop competence in a special field of interest and prepare him or her to meet the changing complexities of life and leadership in the business community. Curriculums are offered in accounting with emphasis possible on governmental, private, and public accounting; business education; business education with an option in distributive education; finance; general business administration; insurance; management; management information systems; management science; marketing; office administration; production and operations management; real estate; and urban business.

Basic courses required of all undergraduates at the University introduce the student to the humanities, social sciences, physical and biological sciences, and the arts. The business curriculums develop the student's professional capabilities through a broad group of business

courses with specialization in one area of study. Business programs provide a strong foundation in accounting, computer science, marketing, organizational management and industrial relations, production and operations management, and statistics. The college emphasizes the behavioral studies and computer technology to meet the needs of the business community and society as a whole. Emphasis is placed upon the total business environment as a part of the national and world economic structure. Theory, analysis, and decision-making are stressed in all areas of learning.

The College of Business Administration is a professional school and has divided its courses into lower and upper divisions. The lower division courses constitute those taught in the freshman and sophomore years; the upper division — those taught in the junior and senior years. Courses taken by transfer students at the lower division level may be applied to satisfying upper division requirements only after successful completion of a validating examination. All 500- and 600-level courses offered by departments in the College of Business Administration are open to matriculated graduate students only.

A student enrolled in this college must complete the curriculum in one of the major areas of concentration and must obtain a cumulative quality point average of 2.00 or better for all required courses in the major area of concentration. Students wishing permission to substitute required courses or waive other requirements may petition the college's Scholastic Standing Committee. Petition forms are available in the dean's office.

Due to limited staff and facilities, transfers from University College to the undergraduate degree programs in business administration must be limited. Although cumulative averages are not the sole criterion for admission, students with overall quality point averages of less than 2.5 are advised that there is little chance for admission to these programs. Students who have not satisfied entrance requirements may petition the Scholastic Standing Committee of the college for a waiver of those requirements during their fourth or succeeding semesters. Students in the University College business programs who have not met entrance requirements to the college are permitted to enroll only in 100- and 200-level business courses and in non-business courses.

To ensure that students in business majors have access to required courses, upper level courses will be open only to juniors, seniors, and graduate students. A strict registration priority will be followed. Highest priority will be given to seniors in the College of Business Administration and in the major, followed by graduate students, juniors in the college and the major, seniors in the college but not in the major, juniors

in the college but not in the major, seniors in other colleges, and juniors in other colleges. Students following an approved area of interest will be assigned as though they were in the college but not in the major.

## Curriculum Requirements

The following two years are common to all curriculums except business education, office administration, and marketing textiles option.

**The Freshman Year Program** is 15 credits in each semester. The sequence MGS 101-102 is begun in the first semester and finished in the second. A speech elective from Division D is taken in either of the two semesters with the balance of credits in general education and liberal electives.

**The Sophomore Year Program** is 15 credits in each semester. The ACC 201-202, ECN 125-126, and MGS 201-202 sequences are begun in the first semester and completed in the second. **Electives.** Professional electives are upper-level courses offered by departments in the College of Business Administration.

Liberal electives are courses offered by departments outside the College of Business Administration.

Free electives may be either professional or liberal electives.

**Area of Interest — Optional.** After choosing a major field, students may elect to declare an

area of interest which will appear on their transcripts as a category separate from their major. Credit may be drawn from any combination of concentration, distribution, electives, and course-level categories. An area of interest may be defined as (1) the completion of 18 or more credits offered within a department and approved by the department chairperson or (2) the completion of 18 or more credits or related studies offered by more than one department and approved by a member of the University faculty competent in the area of interest and the Scholastic Standing Committee of the College of Business Administration. It is the responsibility of the student to declare his or her area of interest no later than the beginning of the semester he or she expects to graduate.

## Accounting

The Department of Accounting offers a curriculum leading to the Bachelor of Science (B.S.) degree. **Faculty:** Professor Martin, chairperson. Professor Vangermeersch; Associate Professors Matoney, Schwarzbach, Swanson, and P. S. Wood; Assistant Professors Cairns, Looney, and St. Pierre; Special Instructor Fradin.

The increased scope of governmental and business activities has greatly extended the field of accounting and has created an unprecedented demand for accountants both in government and in industry. This curriculum has been designed to meet that demand.

In addition to providing a general cultural and business background, the curriculum offers specialized training in the fields of general accounting, cost accounting, and public accounting. It offers specific, basic training to students who wish to become general accountants, industrial accountants, cost analysts, auditors, credit analysts, controllers, income tax consultants, teachers of specialized business subjects, certified public accountants, government cost inspectors, government auditors.

The broad scope of the courses offered makes it possible for a student who is interested in any of the fields of accounting to obtain fundamental training in the field of his or her choice, whether this training is to be used as an aid to living or as a basis for graduate study.

## **Insurance**

The Department of Finance and Insurance offers a curriculum in insurance leading to the Bachelor of Science (B.S.) degree. The Master of Business Administration (M.B.A.) degree with an opportunity for specialization in insurance is described in the *Graduate School Catalog*.

Insurance is a basic industry which functions throughout the economy to indemnify loss and reduce risk. In performing these functions, insurance companies, through their home and branch offices, their agencies and bureaus, currently employ about a million persons in a great variety of jobs (selling, administrative, technical, research, etc.).

For success in this industry, the professional concept with its emphasis on expert knowledge has become increasingly important, and students in this curriculum are prepared for and encouraged to work toward the professional designations conferred by the American College of Life Underwriters (C.L.U.) and the American Institute of Property and Liability Underwriters (C.P.C.U.).

The curriculum offers comprehensive preparation for diversified career opportunities in insurance, including satisfaction of state requirements for agents' and brokers' licenses in fire and marine, casualty and surety, and life and accident-sickness fields. It is approved by state insurance departments in Rhode Island and New York.

## Production and Operations Management

The Department of Management Science offers a curriculum in production and operations management leading to the Bachelor of Science (B.S.) degree. The Master of Business Administration (M.B.A.) degree with an opportunity for specialization in production and operations management is described in the *Graduate School Catalog*.

Issues, concepts, and techniques encountered in efficiently managing the modern production function in industry and business are the main concerns of this curriculum. The modern production function is here defined in a wider sense, to include all kinds of operations which employ men and machines to produce visible goods as well as to render intangible services. A basic understanding of the management task of design and evaluation of the possible alternative operations and processes is emphasized. Practice and implications of computer-based systems and operations in management are also investigated.

The operations management major prepares students to become certified production and inventory controllers. Certification examinations are administered by the national Educational Testing Service (ETS) and prepared by practitioners in the American Production and Inventory Control Society. Coursework in the major goes well beyond that necessary for the examinations and should put the students at the forefront of the field.

Among the topics covered in the major are: forecasting, capacity planning, inventory plan-

# COLLEGE OF ENGINEERING

---

James W. Dally, Dean

Robert H. Goff, Associate Dean

The College of Engineering offers undergraduate curriculums in biomedical electronics, chemical, civil, computer electronics, electrical, industrial, mechanical engineering, chemical and ocean engineering, mechanical and ocean engineering, and urban engineering. Because the same fundamental concepts underlie all branches of engineering, the freshman year courses are quite similar for all curriculums, and the choice of a specific branch of engineering may be delayed until the beginning of either the second term, or the second year of study. Students electing one of the curriculums that include ocean engineering follow the curriculums for chemical, or mechanical engineering for two or three years and enroll in many ocean engineering courses in the junior and senior year.

All of the engineering curriculums are based on an intense study of mathematics and the basic sciences, and of the engineering sciences common to all branches of the profession. On this base is built the in-depth study of the important principles and concepts of each separate discipline. These principles are applied to the

understanding and solution of problems of current interest and importance in the field. Each curriculum is designed to provide the knowledge and ability necessary for practice as a professional engineer, or for successful graduate study, which may include law, business administration or medicine as well as the normal engineering and science disciplines.

The goal of the college is to stimulate the students to become creative, responsible engineers, aware of the social implications of their work, and flexible enough to adjust to the rapid changes taking place in all branches of engineering. Engineers from all fields are heavily involved in the solution of technological and sociotechnological problems. The needs of industry are for balanced teams of both men and women from the different engineering areas.

Engineering students, in common with all students in the University, must meet the University's general education requirements listed on page 10 of this catalog. In these courses students are exposed to and challenged by concepts from the humanities and social sciences to insure that the social relevance of their engineering activities will never be forgotten. In selecting courses to satisfy these requirements, students should consult with their advisers to be certain that they have chosen courses which satisfy both the University requirements and the requirements of the Accreditation Board for Engineering and Technology.

Entering students who have chosen a specific curriculum should follow the particular program listed below. Those who have decided to major in engineering, but have not selected a specific program, should select courses in general chemistry, general education electives, MTH 141, 142; EGR 102; MCE 162 and/or PHY 213 and 285.

Students who are undecided about engineering, but who wish to keep it open as an option, should take note that MTH 141 and 142, MCE 162 or PHY 213 and 285, and a course in chemistry, are required for graduation from the College of Engineering, and are prerequisites for many engineering courses. They normally must be taken at an early stage, preferably before transferring from University College to the College of Engineering. Students who have not taken them before entering the College of Engineering must confer with an engineering adviser to work out a program for completing all degree requirements. In such cases completion of graduation requirements may take somewhat more than the normal time.

## Biomedical Electronics Engineering

The Bachelor of Science (B.S.) degree in biomedical electronics engineering is offered by

the Department of Electrical Engineering. Specialization in biomedical engineering is also available within the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) programs in electrical engineering, described in the Graduate School Catalog.

**Faculty:** Assistant Professor Ohley, coordinator. Adjunct Professor Karlson; Adjunct Assistant Professors Cooper, Most, and Williams; electrical engineering faculty.

Biomedical engineers design medical instruments such as electrocardiographs, electroencephalographs, blood analyzers and X-ray machines used for diagnosis of disease, equipment such as radiotherapy machines, pacemakers and lasers for surgery and develop artificial organs. They design computer systems to help physicians monitor critically ill patients, to correlate a multitude of disease symptoms in order to diagnose a disease, and to determine the best course of treatment.

Biomedical engineers are employed in (1) the medical instrument industry, where they design, manufacture, sell and service medical equipment; (2) hospitals, which employ engineers in increasing numbers to select, evaluate and maintain complex medical equipment and to train the hospital staff in their use, and (3) medical and biological research centers, which use the specialized training of the biomedical engineer to apply engineering techniques in research projects.

The biomedical electronics engineering program combines study in the biological sciences with those areas of engineering which are particularly important for the application of modern technology to medicine. With a few minor elective changes the program also satisfies the entrance requirements of most medical schools, but students who plan to go on to medical school should consult the premedical adviser and the coordinator of the biomedical electronics engineering program.

For transfer from the University College to the College of Engineering in the Biomedical Electronics Engineering program students must have completed *all Division B courses required during the first two semesters* (see below) with grade average of C or better.

The concentration requires 138 credits.

**Chemical Engineering**

The Department of Chemical Engineering offers a curriculum leading to the Bachelor of Science (B.S.) degree in chemical engineering and in cooperation with the Department of Ocean Engineering offers a curriculum leading to the Bachelor of Science (B.S.) degree in chemical and ocean engineering. The Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees also offered by the department are described in the *Graduate School Catalog*.

**Faculty:** Professor Estrin, chairperson. Professors Barnett, Gielisse, Shilling, Thompson, and Votta; Associate Professors Knickle, Rockett, and Rose; Assistant Professor Bryers; Adjunct Associate Professor DiMeglio; Adjunct Assistant Professors Doyle, Sahagian, and Spano.

The chemical engineer is concerned with the application and control of processes leading to changes in composition. These may be chemical and physical processes, and control refers to achieving the desired goal at reasonable cost. The processes are most frequently associated with the production of useful products (chemicals, fuels, metals, foods, pharmaceuticals, paper, plastics, and the like), but also include such seemingly unrelated matters as removal of toxic components from the blood by an artificial kidney, and modeling the flow of exhaust gases from automobiles on the highway (turbulent diffusion and heat transfer coupled with chemical change). The chemical engineer's domain includes more efficient production and use of energy, processing of wastes, and protection of the environment.

Chemical engineers have a strong foundation in chemistry, physics, mathematics and basic engineering. Chemical engineering courses include the use of analog and digital computers, thermodynamics transport phenomena, mass transfer operations, metallurgy, materials en-

<sup>1</sup>All students must demonstrate competence in the expression of ideas in written English. This requirement may be met by satisfactorily completing six credits in Division D (Human Communications).

gineering, process dynamics and control, kinetics, and plant design. The student has the opportunity to operate small-scale equipment to determine efficiencies and operating characteristics, and to visit chemical plants in the area. Intensive work in the solution of complex problems is given in which economics and optimization of engineering design are emphasized.

A chemical engineer with a background in both chemistry and engineering can apply his knowledge of research and development, design, production, and manufacturing not only to the areas listed earlier, but to many others such as textiles, dyes, petroleum, ceramics, paint, and rubber, as well as to biomedical, biochemical, ocean, space, nuclear energy, and environmental problems and processes.

The senior year curriculum for students concentrating in chemical and ocean engineering is listed under Ocean Engineering, page 72.

Programs can be designed for those interested in special areas such as material sciences, biochemical engineering, and pollution control, in general chemical engineering. Programs for those interested in entering dental and medical schools, or schools of business administration, can also be constructed, sometimes requiring a few courses beyond the 129 regular credits.

environmental engineering. The Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees, also offered by the department, are described in the *Graduate School Catalog*.

**Faculty:** Associate Professor Kelly, chairperson. Professors Moulthrop, Nacci, Poon, and Silva; Associate Professors Fang, Lavelle, Marcus, McEwen, and Sussman; Assistant Professor Urish.

Civil engineers are responsible for researching, developing, planning, designing, constructing, and managing many of the complex systems and facilities which are essential to our modern civilization. These include: water supply and pollution control systems; all types of transportation systems from pipelines to city streets; structural systems from residential buildings to city skyscrapers, power plants, and offshore platforms. Civil and environmental engineers play important roles in planning and administration with government agencies at all levels, especially those dealing with public works, transportation, environmental control, water supply, and energy.

The curriculum provides the students with sufficient background to pursue graduate study or to enter directly into professional practice in industry or government after graduation. The first two years are devoted largely to courses in mathematics, chemistry, physics, and engineering science which are common to all engineering curriculums. In their last two years students have a large degree of flexibility in developing their own programs to meet their own professional goals through the selection of professional electives in environmental engineering, soil mechanics and foundations, structural engineering, and transportation and construction.

Students interested in the application of civil engineering to the ocean and coastal zone may select as professional electives such courses as CVE 524, OCE 587, and courses from geology and ocean engineering.

No later than the first midsemester of the junior year each student is required to file a proposed plan of study which has been approved by the faculty adviser and the department. Professional electives and general education electives in Divisions A, C, and D must be selected to satisfy Engineers' Council for Professional Development accreditation requirements.

The junior and senior year curriculum for students concentrating in civil and ocean engineering is listed under Ocean Engineering, page 72.

## Computer Electronics Engineering

The Bachelor of Science (B.S.) degree in computer electronics engineering is offered by the Department of Electrical Engineering. Specialization in computer engineering is also available within the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) programs in electrical engineering, described in the *Graduate School Catalog*.

*Faculty:* Professors Jackson and Tufts, coordinators. Electrical engineering faculty.

Computers and computer-like devices have truly transformed society, particularly in the technologically advanced countries. Computers are everywhere, and all indications are that computers and computer components (digital devices) will be even more pervasive five or ten years from now. Computer engineering is concerned with the design and efficient use of large or small computers and the development of other machines and instruments which contain computers, or parts of computers, as essential building blocks, from the hand-held calculator to the large multi-terminal computer, and the programmable assembly machine. A programmable machine is one which will change its operation in response to a program or command.

Computer engineers may be employed in the design or planning, service, operation, and sale of computer systems as well as the design, serv-

ice, and sale of complex machinery, instruments and systems — such as an automated subway — which require computers as essential parts. The employers may be industrial organizations, transportation companies, federal laboratories, or local government.

The computer engineer must understand the fundamentals of computer logic and programming as well as the fundamentals of electronics and general engineering — mathematics, mechanics, electricity, magnetism, and heat transfer. Engineers use all of this knowledge to create new devices and systems which satisfy perceived human needs. Two four-year bachelor of science programs are available at the University to the student who wants to become a computer engineer: a computer technology emphasis in the senior year of the general electrical engineering program by selecting appropriate electives and the separate electronic computer engineering program which is described below.

For transfer from the University College to the College of Engineering in the Computer Engineering program students must have completed all *Division B* courses required during the first two semesters (see below) with a grade average of C or better.

The concentration requires 129 credits.

## Electrical Engineering

The Department of Electrical Engineering offers a curriculum leading to the Bachelor of Science (B.S.) degree. The Master of Science (M.S.) and Doctor of Philosophy (Ph.D) degrees also offered by the department are described in the Graduate School Catalog.

**Faculty:** Professor Jackson, Chairperson. Professors Haas, Lengyel, Lindgren, Mardix, Mitra, Polk, Poularikas, Sadasiv, Spence, and Tufts; Associate Professors Birk, Daly, Kelley, and Prince; Assistant Professor Ohley; Adjunct Professors Biberman, Karlson, Hall, and D. Middleton; Adjunct Associate Professor Banerjee; Ad-

junct Assistant Professors Cooper, McCollough, Most, and Williams.

Electrical engineers work in all areas in which electrical phenomena are involved. These areas include communication systems, computers, control systems, quantum electronics and electro-optics, electro-acoustics, energy conversion, antennas and radio propagation, design of electronic devices, and bioengineering.

Since electrical instrumentation is at the heart of modern science and technology, electrical engineers are not only employed in the computer, electronics, communications, and power industries, but may also be found in such diverse enterprises as transportation, the chemical industry, large hospitals, medical schools, and government laboratories. By carefully selecting elective courses, the student should be able to enter any of these fields after graduation or be prepared for graduate study in engineering or physics.

The curriculum emphasizes the scientific basis of electrical engineering and the application of mathematical analysis to engineering problems. Work is required in network and systems theory, atomic physics and the behavior of the solid state, electromagnetic theory, and electronics. Creative use of scientific principles in problems of engineering design is stressed particularly in the senior year. Digital computer techniques are a part of many electrical engineering courses.

Extensive laboratory work with electrical and optical devices serves to bridge the gap between mathematical analysis and the real world of "hardware." Separate undergraduate laboratories are available for electrical measurements, electronics, pulse and digital circuits, microprocessors, computer graphics, microwaves and quantum electronics, optics, materials, energy conversion, and systems. Selected students participate in advanced projects including microelectronics, investigation of optical properties of solids, optical and radio propagation, acoustics, computers, robotics, and biological instrumentation.

Electrical engineering students should note that the four-year electrical engineering curriculum allows for three credits of completely free electives which do not have to satisfy any of the general education requirements. Although Division B requirements of 18 credits will be satisfied automatically by courses specified in the electrical engineering curriculum, it is recommended that students take some additional courses in mathematics or physics for which prerequisites have been satisfied.

For transfer from the University College to the College of Engineering in the Electrical Engineering program, students must have completed all Division B courses required during the

first two semesters (see below) with a grade average of C or better.

### Minimum Requirements

This requirement may be met by satisfactorily completing 6 credits in Division D (Human Communications). 2) At least 9 credits from Division A (Arts and Humanities). At least 6 of these credits must be in one area of concentration. 3) At least 9 credits from Division C (Social Sciences). At least 6 credits must be in one area of concentration.

Cooperative work in industry carrying academic credit (ELE 495, 496) is available for a few particularly talented and motivated students who are willing to devote more than average effort to their studies and who are capable of much better than average performance.

The Department of Electrical Engineering offers a five-year B.S.-M.S. cooperative program. Academic course work is alternated between periods of engineering practice at companies or government laboratories selected by the department.

A total of 14 months of industrial experience is obtained in three segments: (1) 3 months, summer between sophomore and junior year; (2) 3 months, summer between junior and senior year;

<sup>7</sup>Must be approved by department adviser.

ELE 495 (3 credits); (3) 8 months, second semester of senior year plus the following summer: ELE 496 (6 credits)

The three assignments are usually, but not necessarily, taken at the same company. The industrial experience grows in technical complexity as the student progresses through the program, with the first industrial experience having a small technical content and the eight-month period at the end of the senior year being a junior engineering position. The student earns credit toward his or her degree for the work done and experience gained during the second and third assignments.

Students interested in this program should contact Dr. J. C. Daly, the department's cooperative work coordinator.

## Industrial Engineering

The Department of Industrial Engineering offers a curriculum leading to the Bachelor of Science (B.S.) degree. The Master of Science (M.S.) degree also offered by the department is described in the *Graduate School Catalog*.

*Faculty:* Professor C. F. James, chairperson. Professors Nichols and Rubinsky; Associate Professors Lawing, Olson, and Shao; Assistant Professors Odrey and Garber.

The industrial engineering curriculum is designed to provide significant strength in mathematics, basic science, and engineering science, plus a carefully coordinated set of courses of

particular importance to the professional industrial engineer. Mathematical modeling of physical systems, optimization, probability and random variables, production systems, materials processing, and metrology are areas that receive considerable attention. The professional portion of the curriculum is augmented with computer science and professional electives.

Upon completion, the student will be prepared amply to pursue a career in the many engineering opportunities in industry, transportation, government, hospitals, and service organizations. The curriculum also provides an excellent background for further formal study in industrial engineering or related fields of physical science.

By using the professional and free electives for certain courses, the student can complete a Bachelor of Science degree in industrial engineering plus a Master of Business Administration degree within five years. See the department advisers for further details.

The concentration requires 128-132 credits.

The general education requirements are: 15 credits in Division A (humanities) and 12 credits in Division C (social sciences) or 12 credits in Division A and 15 credits in Division C. Each Division's requirements can be diminished by a maximum of 3 credits with selected courses in communication skills (Division D).

## Mechanical Engineering and Applied Mechanics

The Department of Mechanical Engineering and Applied Mechanics offers a curriculum leading to the Bachelor of Science (B.S.) degree in mechanical engineering and applied mechanics

<sup>a</sup>ECN 123 is acceptable as a substitute for ECN 125 and as a prerequisite for ECN 126; however, ECN 125 is recommended and preferred for this curriculum.

<sup>b</sup>One course must be selected from the following list of courses: IDE 500, 513, 517, 525, 533, 535, 540, 541, 550, 555, 570; MTH 335, 362, or any 400-level Math course except MTH 451, 452, 456; or ELE 331, 582, OCE 534, CHE 532, 533, 537, 539, 573, MCE 426, 550, PHY 455.

and, in cooperation with the Department of Ocean Engineering, offers a curriculum leading to the Bachelor of Science (B.S.) degree in mechanical and ocean engineering. The Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees also offered by the department are described in the *Graduate School Catalog*.

**Faculty:** Professor Kim, chairperson. Professors Bradbury, G. Brown, Dally, DeLuise, Dowdell, Ferrante, Hagist, Nash, Schenck, Test, M. Wilson, and F. White; Associate Professors Bachelder, Goff, Hatch, Lessmann, Palm, and Sadd; Assistant Professors Datseris and Halliday; Adjunct Assistant Professors Dunlap, Messier, and Patton.

This curriculum provides a thorough and well-rounded foundation in basic science, mathematics, engineering science, and general education to prepare the graduate to enter a professional engineering career. The curriculum is also excellent preparation for graduate school. Mechanical engineers are employed in large numbers in every industry where they frequently assume positions of leadership. The program at the University of Rhode Island is unusually strong in providing a background in systems engineering, design, fluids, and the thermal sciences including energy and energy transfer. Computer applications are stressed throughout the curriculum. All undergraduates are invited to join the Student Section of the American Society of Mechanical Engineers which sponsors industrial plant visits, special lectures, and other activities.

The work in the first two years consists of basic courses in science (mathematics, physics, chemistry), applied science (mechanics, electricity & magnetism, computer science, theory of mechanisms), and general education (humanities, social sciences, communication).

The junior year concentrates on fundamental courses in mechanical engineering (thermodynamics, fluid mechanics, systems engineering, engineering analysis), materials science, engineering economy, and electronic devices. Further general education studies are also covered.

The senior year in mechanical engineering includes machine design, heat transfer, manufacturing processes, and a wide variety of professional electives such as mechanical control systems, advanced fluid mechanics, advanced mechanics of materials, dynamics of machines, internal combustion engines, alternate energy systems including solar and wind energy, power plants, lubrication and bearings, thermal environmental engineering, and vibrations.

Throughout the program the student takes an integrated series of laboratory courses which introduce laboratory techniques and provide prac-

tical experience with the physical and engineering phenomena being covered in concurrent courses. Digital computer techniques are included. The Academic Computer Center's Itel AS/5 Digital Computer is used. Students also use the department's microcomputer and computer graphics facilities.

To receive the Bachelor of Science degree in mechanical engineering and applied mechanics, the student must satisfactorily complete all the courses in the following curriculum, although the sequence may be changed. The curriculum shown below is for the class of 1982 and subsequent classes. Students in the class of 1981 should obtain a check sheet from their advisers.

The concentration for the classes of 1982 and subsequent requires 133 credits.

Those students desiring an undergraduate specialization in ocean engineering may choose the program in mechanical and ocean engineering. Students enrolled in mechanical and ocean engineering must follow the program of study for mechanical engineering during the freshman, sophomore, and junior years. The senior year curriculum for this major is listed under Ocean Engineering.

It is designed to prepare students for systems-oriented activities in the analysis and solution of urban problems. Beginning with core work in mathematics, physics, chemistry and zoology, the curriculum includes computer science, ecology systems engineering, and operations research, as well as work in the social sciences and humanities which provide a general understanding of contemporary urban society. The curriculum includes a summer internship at the end of the junior year and a senior seminar which brings together students in urban affairs concentrations from all parts of the University.

Students who wish to major in this curriculum should consult the appropriate member of the Urban Affairs Program Coordinating Committee for assistance in the formulation and approval of their curriculums.

The concentration requires 126 credits.

# COLLEGE OF HUMAN SCIENCE AND SERVICES

Robert W. MacMillan, Dean

This college is concerned with the human problems of individuals and groups resulting from encounters with changing physical, social, intellectual, and philosophical environments. Its mission is to identify and create knowledge about these problems and to prepare professionals who are competent to deal with them.

The college offers undergraduate programs in child development and family relations; home economics; home economics education; textiles, clothing and related art; textile marketing; physical education, health, and recreation; and elementary and secondary education. It also offers interdisciplinary programs in general home economics, gerontology, urban affairs, consumer affairs and special populations. Students are encouraged to maintain close contact with their advisers in order to be informed of new curriculums and course options as they develop.

The degrees currently offered by the college include: (1) a Bachelor of Science degree with concentration in physical education; (2) a Bachelor of Science degree with a concentration in textile marketing; and (3) a Bachelor of Science

degree in home economics with concentrations in child development and family relations; general home economics; home economics education; home economics in the urban environment; and textiles, clothing, and related art; and (4) a Bachelor of Arts degree in elementary and secondary education.

The college is currently composed of four departments and a Division of Interdisciplinary Studies.

The Institute of Human Science and Services, the research and service branch of the college, promotes these activities in human service areas across all departments of the college. The institute carries on research in education and educational testing, lifelong learning, human transition, child development, special populations, gerontology, and exercise physiology. Faculty who are involved in the research of the institute also teach within the various departments of the college.

The college sponsors the URI Clearinghouse for Volunteers, a service which matches prospective volunteers with positions in Rhode Island's human science and service agencies, giving students opportunities to explore career options and provide needed service. (See also page 9.)

**Division of Interdisciplinary Studies.** This division provides an environment in which faculty and students may bring together interdisciplinary programs and courses of study in human science and services. The division functions to promote and encourage the creation, implementation, and evaluation of interdisciplinary courses and programs of study taught by faculty from two or more departments within the University. In addition, the division assumes responsibility for the development, review, and implementation of programs of study which draw significantly on two or more human science and services departments. The division maintains administrative responsibility for the following programs: General Home Economics (see page 76); Home Economics in the Urban Environment (see page 79); Consumer Affairs (see page 11); Gerontology (see page 11); and Special Populations (see page 12).

**Area of Interest Option: Interdisciplinary Non-Degree Programs.** The college currently offers an area of interest option for all students enrolled in the college. Under this option students may declare an area of interest which will appear on their transcripts as a category separate from their major. Credits may be drawn from any cohesive combination of courses. An area of interest may be defined as (1) the completion of

<sup>1</sup>Students enrolled in the elementary and secondary education curriculum leading to the B.A. degree should follow the distribution requirements for the College of Arts and Sciences (see page 34).

<sup>2</sup>Students who can successfully pass competency examinations in Speech 101 or 102 (administered by the Speech Department) and/or Mathematics 107 (administered by the Mathematics Department) will earn credit and will be exempt from these courses and requirements.

Students presently enrolled in the curriculums under the College of Human Science and Services have a choice of completing the previous general education requirements or the new requirements.

It is the responsibility of the student to declare and obtain approval for an area of interest no later than the end of the add period at the start of the senior year.

## Child Development and Family Relations

The curriculum in child development and family relations leads to a Bachelor of Science (B.S.) degree in home economics. The Master of Science (M.S.) degree also offered by the department is described in the *Graduate School Catalog*. The undergraduate curriculum provides a general background for work with children, families, and adults. Most such professions require academic work beyond the bachelor's degree for continuing professional work and advancement. Individuals with a baccalaureate degree are employed as professionals however, in nursery schools, day-care centers, institutions and hospitals, recreational, child guidance, case work, and other community agencies. Some of the courses in this curriculum, plus certain others in education, meet the requirements for the Provisional Nursery-Kindergarten Certificate in Rhode Island. The Professional Certificate requires successful teaching experience for five years and additional academic work.

Students are required to select and pass one course in each of the following home economics core areas: FSN 201, 207, or 237; HMG 210, 320, or 340; TXC 103 or 224. If not taken to complete the above core requirements, students must also take: HCF 150, 200, 201, 357, 330, 304, 400, 430, 310 or 420 or 406. Additionally, students must complete 18 credits in home economics or related areas subject to the approval of the departments, with a maximum of six credits in any one area outside home economics. EDC 484 and HCF 380 may not be used.

Students who wish to meet the requirement for the Provisional Nursery-Kindergarten Certificate in Rhode Island must take the following courses in addition to the above: EDC 102 and 312, 484, and 485; HCF 301 and 303. The sequence of courses is extremely important since placements for student teaching will be during the fall semester only. Students interested in certification must apply by their third semester. It is suggested that they see their University College advisers as early as possible in their program.

A total of 128 credits is required for graduation.

## Education

The curriculum in elementary and secondary teacher education leads to the Bachelor of Arts (B.A.) degree. The Master of Arts (M.A.) degree programs in education are described in the *Graduate School Catalog*.

The curriculums offer a balanced program of academic preparation and professional training. The required professional courses contribute directly both to teaching skills and to the teacher's role in society.

The department also offers sufficient courses to allow a student to complete an area of interest. Students should consult the department chairperson or an education adviser in University College.

The following courses are required in the professional sequence: EDC 102 or 103, 312 or 313, 371 or 372, 484, and 485; PSY 113 and 232.

In addition, secondary education students will take EDC 430; elementary education students will take EDC 427, and 428 prior to student teaching and EDC 424 after student teaching. EDC (MUS) 329 is also strongly advised for elementary students.

Students may apply to the department from University College upon completion of University College requirements and should consult with the education adviser as early as possible for further information, since openings in the programs are limited.

All students in the department will plan, in cooperation with an adviser, a second concentration of 27-30 credits. This may or may not be declared as a "double concentration." The second concentration of secondary education students must be in the area for which a teaching certificate is sought.

After admission to the curriculum, all students must maintain an average of at least 2.20, and attain a grade of at least C in EDC 430 or 427 and 428 to be eligible for student teaching. Failure to meet these two conditions will lead to automatic dismissal from the program.

A total of 120 credits is required for graduation.

## General Home Economics

The curriculum in general home economics leads to the Bachelor of Science (B.S.) degree in home economics. Interdisciplinary in nature, the program provides for academic work in all areas of home economics combined with a professional area of interest selected by the student. Professional areas of interest prepare students for fields such as community agency work, home economics in business, journalism, and home economics in the urban environment.

Students are required to take five to six credits from FSN 150, 201, 207, or 237; six credits from HCF 150, 200, or 201; HCF 330, 357; HMG 210; three credits from HMG 220, or 320; HMG 340; HSS 320; HEC 400; TXC 103, 224; three credits from TXC 216, 327, 340, or 440. Students are required to take additional courses that will give a total of 15 credits in one area of home economics (FSN, HCF, HMG or TXC) with at least 9 credits at the 300 or 400 level.

In addition, students are required to take 18 credits in a professional area of interest, of which at least 9 credits are to be taken in a single area (adviser approval required); and field experience for at least 3 credits (adviser approval required).

A total of 128 credits is required for graduation.

## Home Economics Education

The curriculum in home economics education leads to a Bachelor of Science (B.S.) degree in home economics. The Master of Science (M.S.) degree is also offered by the department and is described in the *Graduate School Catalog*.

The curriculum provides the following two options:

**Option I: Teacher Certification.** This program meets the state of Rhode Island requirements for certification (K-12) and also meets the Interstate Certification Compact which allows certification reciprocity with 31 states. The student teaching experience in the public schools (as well as additional field experiences) is included in the program during the senior year.

**Option II: Non-teacher Certification.** This program prepares individuals to teach and direct home economics educational activities in settings such as business, community agencies, adult programs, and home economics cooperative extension. An eight-credit eight-week intern experience is included in the program during the senior year.

Students are required to select and pass one course in each of the following home economics core areas: HCF 150, 200, or 330; FSN 201, 207, or 237; HMG 210, 320, or 340; TXC 103 or 224. If not taken to complete the core requirements, students must also complete HCF 200, 330 and one HCF elective; EDC 102 or 403, or 407, and 312; EDC 484 or HED 483; HED 334, 337, EDC/HED elective; FSN 201, 207, 221; HMG 320, 340, elective; TXC 103, 216, 305 or its equivalent.

A total of 128 credits is required for graduation.

Students who do not specialize in any of the above areas must complete a minimum of twelve credits of physical education, including PED 324, 315, 317 and an additional eight credits selected from EDC 401, FSN 207 or any other departmental offering excluding intercollegiate athletics.

**Non-teacher Certification Option.** This option is designed for students seeking preparation for careers in non-school settings. The option provides additional opportunity for specializations in (1) dance, (2) physical fitness, (3) corrective and adapted physical education, (4) interdisciplinary areas of interest.

In addition to the requirements listed above for all physical education majors, students in the non-teacher option are required to take: RCR 382, PED 317, three credits of seminar, and 12 credits of supervised field work.

Students selecting dance as a specialization must take PED 106B, 324, 331, 466, four credits from PED 106A, 106C, 106D, 106E, THE 151, 215, 216, and any two of the following courses: MUS 111, THE 100, 111, ART 215, SPE 231, or PHL 455.

# COLLEGE OF NURSING

---

Barbara L. Tate, Dean

The College of Nursing offers a curriculum leading to the Bachelor of Science (B.S.) degree. The Master of Science (M.S.) degree also offered by the college is described in the *Graduate School Catalog*.

**Faculty:** Professors Garner, Kang, Tate; Associate Professors Castro, Cumberland, Del Papa, Hirsch, Houston, McElravy, and Schwartz-Barcott; Assistant Professors Abbate, Barden, Bissell, DeCosta, Evans, Feather, Fortin, Haggerty, Hames, Joseph, Manfredi, Morgan, Munro, O'Flynn-Comiskey, Pearson, Smith, and Waldman; Instructors Burchard, Halpin, Kachadourian, Risio, and Ryan.

The baccalaureate program is designed for men and women with academic, personal, and professional potential. It aims to develop mature, well-informed graduates who will take their places as responsible members of society in meeting the challenges of health care delivery and of continued learning.

The curriculum is based on the belief that nursing is a creative activity which provides human

services for the promotion of health, prevention of illness, and care for the ill, and that it is interdependent with all other disciplines concerned with health. Nursing knowledge is viewed as a unique synthesis drawn from the humanities, and natural, biomedical, and social sciences. The conceptual approach to nursing study incorporates the whole person and his environment, adaptation-level theory, and nursing process. Nursing courses include observation and clinical practice in numerous hospitals, community agencies, schools, nursing homes, and physicians' offices throughout the state of Rhode Island.

There are three routes to admission to the College of Nursing baccalaureate program:

1) *Students with no previous college of nursing study begin their preparation in University College with dual enrollment in the College of Nursing. After completion of 45-60 credits which must include required foundation courses with a minimum 2.0 quality point average, they may apply for confirmed admission to the College of Nursing. Priority is given to students with strong academic records and positive recommendations from faculty in introductory nursing courses.*

2) *Students with college study in another major or some nursing study in another baccalaureate program and a minimum of 45 completed credits, if accepted by the University, may be admitted directly.*

3) *Registered nurse students who have completed diploma or associate degree programs are not required to submit scholastic aptitude scores when seeking admission. As adult students who have developed a meaningful competence in basic subject areas, they may demonstrate their mastery by completing the College Level Examinations sponsored by the College Entrance Examination Board. Advanced credit allowances are based upon a review of the candidate's test scores and preparatory experience. Following direct admission to the college, students have the option of seeking credit by examination in subjects previously studied. They are required to enroll in some upper division nursing courses and to meet remaining program specifications.*

The usual time for completion of all requirements for students with no previous college or nursing study is eight semesters and one summer session. All students in the College of Nursing meet all of the general education requirements of the University as listed on page 10. A minimal grade of C must be achieved in all required nursing courses. The faculty reserves the right to require withdrawal from the college of a student who gives evidence academically and/or personally of inability to carry out profes-

sional responsibility in nursing. The student is limited to 18 credits per semester except by permission of the dean for special program adjustments or for participation in the Honor Program.

General expenses for students in the College of Nursing are approximately the same as for all other University students. Special items include uniforms, nursing equipment, transportation, and one summer session. The use of an automobile or funds to meet public transportation costs is required during the semester of community health nursing experience, and can offer broader opportunities for experience in all courses.

The program is approved by the National League for Nursing and the Rhode Island Board of Nurse Registration and Nursing Education. The graduate is eligible for examination for professional licensure.

# COLLEGE OF PHARMACY

---

Heber W. Youngken, Jr., Dean  
Lois Vars, Assistant Dean

The College of Pharmacy offers a five-year curriculum leading to the Bachelor of Science (B.S.) degree in pharmacy and a special curriculum leading to the Bachelor of Science (B.S.) degree in respiratory (ventilation) therapy. The Master of Science (M.S.) degree, offered by all departments; the Doctor of Philosophy (Ph.D.) degree in pharmaceutical sciences offered by all departments except pharmacy administration, and the Master of Science (M.S.) degree in environmental health science are described in the *Graduate School Catalog*.

## Pharmacy

This five-year curriculum is patterned on presently accepted programs of study recommended by the American Association of Colleges of Pharmacy, the American Council on Pharmaceutical Education, and other interested organizations. It is accredited by the American Council on Pharmaceutical Education and by the University of the State of New York, Division of Professional Education.

It provides preparation for community and institutional pharmacy practice. In addition, students have opportunities through the selection of professional electives to commence a specialization in one of several areas of pharmacy, including hospital, clinical, manufacturing, medical supply servicing, drug analysis, administration, and research.

The satisfactory completion of the degree in pharmacy is one of the prerequisites for a license to practice pharmacy. Licensure is obtained after graduation by successfully completing the examination given by the Rhode Island State Board of Pharmacy or those of other states. In preparation for this, students are encouraged to participate in externship or internship programs.

Students begin their preparation in University College with a dual enrollment in the College of Pharmacy. All students requesting transfer from University College to the College of Pharmacy must have at least a 2.0 overall quality point average in those basic science courses required for transfer; viz., at the end of three semesters BIO 101 and 102; CHM 101, 102, 112, 114, and 227; MTH 141; PHY 109; at the end of four semesters the foregoing courses plus CHM 226 and 228; MIC 201; ZOO 121 (or equivalent courses, where permitted).

A quality point average of 2.0 in all required professional courses given by the College of Pharmacy is required for graduation with a B.S. degree in pharmacy. This is in addition to University grade requirements.

Students in certain other New England states may enroll in pharmacy under the New England Regional Student Program. See page 21.

## CURRICULUM REQUIREMENTS

The five-year program for all accredited colleges of pharmacy provides time for the general education requirements as described on page 11. The major portion of the professional program begins in the third year when basic pharmaceutical and clinical disciplines are introduced.

Each year the curriculum is supplemented by field trips to selected pharmaceutical industries. Students also make use of selected hospital and community pharmacies in Rhode Island and New England for clinical studies and internship requirements.

# COLLEGE OF RESOURCE DEVELOPMENT

Gerald A. Donovan, Dean  
Albert L. Owens, Director of Resident Instruction

The College of Resource Development provides four-year curriculums in animal science, plant science, food science, nutrition and dietetics, natural resources, agricultural and resource technology, and urban affairs leading to the Bachelor of Science (B.S.) degree. It also offers a two-year program in fisheries and marine technology leading to the Associate in Science (A.S.) degree. These curriculums are administered by the Director of Resident Instruction working directly with the college faculty.

The activities of the resource development faculty differ from those of the other colleges in that most appointments carry joint responsibility for the formal research programs of the Agricultural Experiment Station and Cooperative Extension Service, in addition to graduate and undergraduate teaching.

The departmental organization of the faculty reflects the discipline orientation of the research programs. Graduate programs leading to the Master of Science (M.S.) degree are offered by most departments and some programs lead to

the Doctor of Philosophy (Ph.D.) degree. The Master of Community Planning (M.C.P.) degree is offered by the Department of Community Planning and Area Development. These are described in the Graduate School Catalog.

**Resource Development Education Faculty:** Professor D.E. McCreight, *director*. Professors Bromley and Shontz.

## Bachelor of Science Curriculum

All four-year curriculums offered by the college carry a total of 130 credits and contain four categories of requirements: basic core, concentration, directed electives, and free electives.

The *basic core* courses give students an exposure to the natural sciences, mathematics, social sciences, humanities and communication skills. Course requirements common to all curriculums are summarized below. Additional basic core requirements are included in the curriculum descriptions and provide the background essential to professional objectives and a general education.

The credits assigned to the *concentration* and *directed elective* categories are used by the student, in close conjunction with his or her faculty adviser, to develop an individualized program of study containing the desired depth and breadth in one or more disciplines consistent with career interests. By requiring the 24 concentration credits at the 300 level or above, a quality program is assured. The block of *free electives* gives the student freedom to explore areas outside his or her principal interest.

With the exception of certified programs in food science and in dietetics, all curriculums are characterized by a minimum of structure. This is a realistic recognition that entering students vary widely in the degree of precision with which they have defined their educational goals. Many are still concerned with discovering their real aptitudes and interests, and use their undergraduate programs to this end. Those with precise professional objectives have no difficulty in shaping their programs to meet their particular needs. Furthermore, this flexibility forces the student to play an important and continuing role in the direction and development of his or her program.

**Common Basic Core Requirements.** All curriculums contain the following basic core course selections: 6-8 credits in animal and plant biology, 8 credits in general chemistry or other physical sciences; 3 credits in mathematics, 9-12 credits in the social sciences, 9-12 credits in the humanities, and 6 credits in communication skills.

**Natural Resources.** Students in this curriculum share a common concern over the complex prob-

lems associated with man's use or misuse of the nation's natural resources, and are preparing to play some role in their resolution. They may prepare for graduate programs in marine biology, oceanography, fisheries biology, wildlife management, and resource economics, or more technically oriented positions in the management and conservation of our soil, water, mineral, energy, forest, fisheries, and marine resources.

Additional basic core requirements include RDV 100 and a course each in organic chemistry, physics, earth science, soils, resource economics, political science, and sociology.

**Animal Science.** This curriculum is designed for students who plan to continue their formal training in one of the disciplines in animal science including veterinary medicine, aquaculture, animal management, nutrition, physiology, pathology, or applied genetics.

Additional basic core requirements include ASC 101, 102, a second course in general chemistry and a course each in organic chemistry, physics, physiology, genetics, microbiology, calculus, and statistics.

**Plant Science.** This curriculum provides a framework within which students can develop a strong background in the basic and applied plant and related sciences. Most students are preparing for graduate study in fields such as plant protection, nutrition, breeding, physiology, and pathology.

Additional basic core requirements include PLS 104, 105, 212, a second general chemistry course, a course in organic chemistry, a biochemistry or second organic chemistry course, a course each in earth science or physics, and a course in genetics, plant physiology, microbiology, algebra, and statistics.

**Food Science and Technology.** The University is officially recognized by the Institute of Food Technologists as offering a curriculum in food science and technology. The curriculum is in this college, and students are advised by faculty of the food science and technology, nutrition, and dietetics department.

Additional basic core requirements include the basic courses in nutrition and food science, microbiology, organic chemistry, biochemistry, physics, calculus, and statistics. Information on specific program requirements may be obtained from the Office of Resident Instruction.

**Nutrition and Dietetics.** This curriculum is available to students with interests in the areas of nutritional science. In addition, students can, with proper advisement, include all of the coursework recommended by the American Dietetic Association.

Additional basic core requirements include nine credits of basic food science and nutrition courses, and courses in human physiology, microbiology, and biochemistry.

**Agricultural and Resource Technology.** This curriculum is designed for students with career interests in the more practical or technical aspects of animal, plant, and soil sciences, and consequently does not require the depth in the basic sciences provided in the science curriculums. Students study in areas such as ornamental horticulture, turf management, fish culture, animal management, and soil conservation.

Additional basic core requirements include a course in genetics and four introductory courses from among those offered by the several departments of the college.

**Urban Affairs.** The curriculum in resource development in the urban environment is part of the interdisciplinary Urban Affairs Program (see page 12), and seeks to provide students with an understanding of how human and natural resources pertain to urban affairs. Training is oriented to provide students with a basis for work with government or private agencies concerned with problems related to natural resources in contemporary society.

Additional basic core requirements include one course in the physical or biological sciences and four introductory courses from those offered by the several departments in the college. Individual student programs are designed to meet the core and concentration requirements of both the college and the Urban Affairs Program.

**Teacher Education.** Students with 36 or more credits in resource development course work can meet teacher certification requirements in agribusiness and natural resources by including the following education courses in their undergraduate programs: EDC 102, PSY 113, EDC 312, RDE 444, EDC 484 (9-12 credits), RDE 486 (0-3 credits), EDC 485, and 9 credits in related mechanics courses. Students planning to include the teacher education requirements should enroll in the agricultural and resource technology curriculum.

## Associate in Science Program

**Fisheries and Marine Technology.** This two-year program, leading to the Associate in Science degree, was designed in cooperation with commercial fishermen and federal and state agencies to provide a thorough training for students intending to enter any sphere of commercial fisheries or

marine technology. The 72-credit curriculum provides fundamental knowledge of fishing; vessel operation, equipment, handling and navigation; fishing methods and gear; fishery business, economics, marketing and legislation; fish and their behavior.

Work on board ship, in the net loft, seamanship and navigation laboratories, engineering laboratory, and marine electronics and vessel technology laboratories make up a good proportion of credit hours. Formal classes on the campus will provide a background in the social, biological, and physical sciences, as well as the professional subjects of navigation, seamanship, fishing gear and methods, engineering, marine electronics, and vessel technology. Laboratory work is conducted on board the training vessel and in the waterfront laboratories.

This program is available to students in all New England states under the New England Regional Program sponsored by NEBHE (page 21).

# COURSES OF INSTRUCTION

All permanent undergraduate courses offered at the University of Rhode Island are listed on the following pages by subject in alphabetical order. If any subject cannot be located readily, refer to the index. Courses numbered 001 to 099 are pre-freshman and special undergraduate courses and do not carry bachelor's degree credit. Those numbered 100 to 299 are lower division undergraduate courses and those numbered 300 to 399 are upper division undergraduate courses. The 400-level courses are generally limited to juniors and seniors majoring in a field, but open to other advanced undergraduates and to graduate students with permission.

The 500-level courses, listed in this bulletin by title line only, are graduate courses with a bachelor's degree usually prerequisite, but qualified seniors and honors students are admitted with permission. For a full description of these and courses at the 600- and 900-levels, see the *Graduate School Catalog*.

Courses with two numbers, e.g. ACC 201, 202, indicate a year's sequence and the first course is either a prerequisite for the second or at least the two cannot be taken in reverse order without special permission. If a course is also offered by another department, this information appears following the course number. The roman numeral indicates the semester the course will be offered, SS means the course is offered during the Summer Session, SS/DUE Summer Session at the Division of University Extension in Providence, the arabic numeral indicates the credit hours. Distribution of

class hours each week is in parentheses. S/U credit signifies a course in which only satisfactory or unsatisfactory grades are given. The instructor's name follows the course description.

The schedule of courses is issued by the Registrar immediately before the preregistration period for each semester and again just before registration day. The schedule of courses lists the specific courses to be offered that semester with the time of meeting, location, and instructor assigned for the section.
